PART VI Bills of the Indian Council

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Second Publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th September 1880 and was referred to a Select Committee —

No 18 of 1880

A Bill to enlarge the rate of Port dues leviable at Madras

WHEREAS it has been determined to construct an artificial harbour for the port of Madras and to defray a portion of the interest on the principal sum expended on the construction of such harbour and of the annual expenses of maintaining the same out of the dues leviable on sea going vessels of fifteen tons and upwards entering the said port

And whereas the maximum rate of such dues is fixed by the Indian Ports Act 1875 section forty five and the third part of the first schedule thereto annexed and the amount of such rate is insufficient to defray such portion of the said interest and expenses in addition to the other charges to meet which the said dues are applicable

And whereas it is therefore necessary to enhance to the extent hereinafter mentioned, the maximum rate of dues so leviable

It is hereby enacted as follows —

1 This Act may be called The Madras Port Dues Act 1880 and

It shall come into force as soon as the said harbour is in the opinion of the local Government open

for the use of sea going vessels of fifteen tons and upwards and the said Government has published in the Port of St George Gazette a notification to that effect

2 In the Indian Ports Act 1875 first Schedule Part III the following amendments shall be made that is to say—

(a) in the first column the numeral and word 9 Madras shall be omitted

(b) in the first column, above the heading "Eastern Group" the word 'Madras' shall be inserted and

(c) opposite the word 'Madras' so inserted there shall be inserted—

(1) in the second column the words 'sea going vessels of fifteen tons and upwards' and

(2) in the third column the words 'not exceeding eight annas per ton' Provided that in the case of vessels employed in the coasting trade not being steamers the rates shall be one half the rates chargeable in respect of other vessels'

STATEMENT OF OBJECTS AND REASONS

The funds requisite for the construction of the artificial harbour at Madras are being advanced by the Government

It is estimated that the whole cost of the work will amount to Rs 6,80,000 and it is proposed to raise by taxation levied on the trade of the port an annual income sufficient to pay interest at 1 per cent on this sum together with Rs 60,000 the estimated annual charge for maintenance

Port dues at the rate of 3 annas (or in the case of coasting vessels 1½ annas) per ton can at present be levied under the Indian Ports Act 1875 on vessels entering the port and the simplest mode of raising the requisite income would be by an enhancement of those dues. It is however manifest that they could not be enhanced beyond a certain point without injuriously affecting the calling trade of the port and it has accordingly been determined after reference to the Madras Chamber of Commerce that the best course to take will be to raise only a portion of that income in the shape of Port dues leaving the rest to be raised by a tax on goods landed and shipped the precise form of which will be settled hereafter. In accordance with this determination the present Bill has been prepared. It admits of the Port dues being raised to eight annas per ton or in the case of vessels employed in the coasting trade and not being steamers to four annas. The additional income which may be obtained by so raising them is estimated at Rs 1,60,000 per annum.

The Bill is drawn so as not to come into operation till the new harbour is open

STATEMENT OF OBJECTS AND REASONS

The Courts now known as the Courts of Small Causes in the Presidency towns were established by a Charter of George the Second dated 8th January 1753, and would accordingly appear to be the oldest Courts at present existing in British India.

They have from time to time undergone many changes their constitution having been remodelled their jurisdiction extended and their procedure amended by various enactments and orders in particular by Acts IX of 1850 and XXVI of 1864 which placed them on a footing closely resembling that of the English County Courts but they have been left to a great extent untouched by the important legislation by which in recent years, the procedure of the other Civil Courts in this country has been reformed.

The result of this is that they have become somewhat antiquated and do not fit in with the rest of the Indian judicial system that their powers and procedure are in many particulars defective and that though owing to the efficient manner in which they have been worked they have generally given satisfaction questions have often to be discussed in them which to use the words of a late Small Cause Court Judge now on the Bench of the Madras High Court is totally foreign to the people who resort to them, and some of which have only an historical interest—even in England.

2 The need of completely revising the law relating to these Courts was pointed out many years ago by Mr Fian and Mr Boulnois two of the ablest Judges who have presided in the Calcutta Small Cause Court and in the year 1868 a Bill was drafted for this purpose by Mr Pitt Kennedy but further action in the matter has been from time to time postponed pending the consideration of certain proposals regarding the jurisdiction and powers of the Courts. The proposals have now been fully discussed as near an approach to unanimity regarding them as can well be hoped for has been attained and the present Bill has accordingly been prepared to consolidate and amend the entire law.

The most important change introduced by it lies in the extension of the pecuniary limit of the jurisdiction from Rs 1 000 to Rs 2 000. This extension was asked for by the Calcutta Trade Association as far back as 1867. It has since then been much discussed and has the approval of the Governments of Madras Bombay and Bengal of the High Court of Madras and subject to a limitation to be presently referred to, of the High Court at Calcutta. The only opposition to it comes from the High Court at Bombay and that opposi-

tion appears to proceed not so much from any objection to the principle of the extension as from a fear that it will not be acceptable to the public—a point on which we shall be better able to form an opinion after the Bill has been published.

The Bill it will be observed is drawn so as to extend the jurisdiction in all classes of suits cognizable by the Court. The Calcutta High Court would have excepted actions of tort but it has been thought well to avoid if possible making any distinctions of this sort which to persons of the class who resort to the Small Cause Court and their advisers would it is feared occasion difficulties.

4 Assuming that the pecuniary limit of the jurisdiction is to be raised as proposed the question arises whether any appeal should be allowed in suits above Rs 1000 or whether the present system of allowing a new trial by the Court itself and a reference to the High Court on a point of law is sufficient. On this point the difference of opinion has been greater.

The Governments of Bombay and Bengal the Calcutta High Court and the Judges of the Small Cause Court at Bombay are against admitting an appeal. The Government of Madras the High Court there and the Judges of the Small Cause Courts at Calcutta and Madras are in favour of it as was also Mr Kennedy at the time he drew the Bill already referred to.

On the one hand it is urged that allowing an appeal is—especially as it involves the taking of notes of evidence and the writing of judgment—inconsistent with the summary procedure of the Small Cause Court that the hearing of cases subject to appeal could not conveniently be carried on simultaneously with the ordinary Small Cause Court work and that the existence of a power to appeal would render litigation needlessly protracted and expensive.

On the other hand the importance of providing a check on the trial of questions of fact in suits of the higher value is insisted on and it is pointed out that in two at least of the Presidency towns the practice of taking notes of evidence in all contested cases already prevails. The Bill as it is now drawn does not provide an appeal but the Select Committee to which it is proposed to refer it will no doubt consider whether in suits above Rs 1000 an appeal should not be allowed.

5 The next question which presents itself in connection with the jurisdiction of the Court is that as to the classes of suits which the Court should be empowered to hear. It has been thought best both with a view to relieve the High Court as far as possible and in order to avoid as far as may be the doubts and difficulties which attend the construction of provision of this sort to draw the Bill so as to give the Small Cause Court jurisdiction in suits of all descriptions with certain specified exceptions.

6 The most important of these exceptions is that of suits for the recovery of immovable property. It appears from the records of the Legislative Department that those who framed Act IX of 1850 intended that its 20th section should confer jurisdiction on the Small Cause Courts in such suits but there has been a considerable difference of opinion as to the actual effect of that Act and of its amending Act (XXVI of 1861) in this particular.

The High Courts of Calcutta and Bombay have held that the Small Cause Courts were given jurisdiction in the suits in question by the 20th section of Act IX of 1850. The Bombay High Court has held further that a like jurisdiction was conferred in suits up to Rs 1000 by the Act of 1861 while the Judges of the Calcutta Small Cause Court hold that their jurisdiction in such suits was not extended by that Act. The Madras High Court has held that neither Act conferred any such jurisdiction. To this it should be added that in Calcutta the jurisdiction though held to exist up to Rs 500, is for some reason which has not been fully explained but is not resorted to.

The Madras and Bombay authorities and the majority of the Calcutta High Court are in favour of giving the jurisdiction. The Bengal Government the officers consulted by it (including the Judges of the Calcutta Small Cause Court) and four of the Judges of the Calcutta High Court are against it. The Bill, as has been already stated does not give it and it is manifest that if it were to be given, special provisions relating to it would need to be introduced. An appeal should certainly be given proper provision would have to be made for execution and probably some rules would, as suggested both from the Calcutta and Madras High Courts be required to limit the operation of the decisions as *res judicata*.

Other cases in which the Bill proposes to withhold jurisdiction from the Small Cause Courts are suits against the Secretary of State in Council suits for partition foreclosure redemption suits for the specific performance or the rescission of contracts relating to immovable property administration suits suits to obtain an injunction suits to enforce a trust.

7 One point more remains to be noticed in connection with the jurisdiction of the Courts.

Act IX of 1850 in conferring jurisdiction on the Courts up to a value of Rs 500 confines its exercise to cases of defendants dwelling or carrying on business within the local limits. Act XXVI of 1861 on the other hand in conferring jurisdiction between the values of Rs 500 and Rs 1000 gives an alternative ground for its exercise namely, the circumstance of the cause of action having arisen within the local limits. It has been urged by most of the authorities consulted that the basis of the jurisdiction should be the same in the cases of

all values. On the other hand, fears have been expressed by some that a power to institute a suit of the lower value against a defendant residing at a distance might be liable to abuse unless some limitation were imposed. The correct view of the matter seems to be that taken by the Judges of the Madras High Court and Mr Buxted namely that in this particular no distinction should be made between the High Court and the Small Cause Court and accordingly the Bill has been drawn so as to place the jurisdiction of the Small Cause Court in this respect on precisely the same footing as that on which the jurisdiction of the High Court is placed by the Letters Patent.

8 The want of any power to execute the decree of a Small Cause Court against immovable property except by the circuitous process of instituting a suit upon such decree in the High Court has for many years past been complained of as involving an undue hardship to plaintiffs and in some places particularly in Madras driving them to institute their suits in the High Court instead of in the Small Cause Court. The objections that exist to giving the Small Cause Court jurisdiction in suits to recover immovable property apply also to giving them power to execute their decrees against immovable property and it is accordingly proposed by the Bill (section 24) to empower the Court to send its decrees for execution to the High Court or to a mufassil Court in the same way as the mufassil Small Cause Courts do under section 20 of Act XI of 1865. The only serious opposition to this proposal comes from the High Court at Bombay and it rests mainly on the political or economical objections which of late years have been so frequently urged against the sale of immovable property in execution of decrees—objections which however weighty they may be in the mufassil where the land is the only means of livelihood of the mass of the people and is in fact the basis of society have little or no force in the cases that occur in the Presidency towns.

9 Section 21 of the Bill and the Schedule make the Code of Civil Procedure the foundation of the procedure of the Small Cause Courts in the Presidency towns as it is of the same in the mufassal but the special provisions of the existing Acts regarding Court fees, fee to Counsel and attorney and suspension of execution in cases of sickness &c have been retained and it may be a question whether further modifications of the general law for example as regards the payment of expenses of witnesses (Code sections 160 to 162) should not be introduced.

10 In the chapter relating to the recovery of small tenements several amendments have been introduced but they are merely such as are necessary in order to make the meaning of the original law clearer or such as the working of the similar law in England has shown to be desirable. Thus the limitation of the operation of the chapter to cases in which the possession has commenced either in a tenancy or in permissive occupancy is clearly in accordance with the intention of the authors of the law and though all doubt on this point was as far as the Court at Calcutta is concerned precluded by a decision of the Supreme Court there in the year 1851 the circumstance mentioned in one of the communications received that another High Court has taken the directly opposite view shows the necessity of making the law more distinct.

11 The words "the value of the rent" in section 91 of Act IX of 1850 were copied from section 122 of the English County Courts Act 9 & 10 Vic c 122 where they were probably used *per incurram*. Their effect according to the construction put upon them in a well known case is that property of great value e.g. extensive buildings erected on a plot of land held at a rent below Rs 1000 might be brought within this very summary jurisdiction. The Bill provides that there shall be no jurisdiction if the annual value at a rack rent exceeds Rs 1000.

12 The chapter on insolvency jurisdiction is completely new. The introduction of a chapter of this sort has been advocated by the Government of Bengal the Calcutta High Court and the present Chief Justice of Madras with a view to relieving the High Courts of a mass of petty work with which they are at present burthened to the great detriment of more important business. There has been some difference of opinion as to the way in which the insolvency jurisdiction should be divided between the High Court and the Small Cause Court. The principal division adopted by the Bill which assigns to the Small Cause Court all cases of non traders leaving to the High Court only the cases of traders is that proposed by the Calcutta High Court and it seems to be the most convenient as it is as a rule in the latter class of cases only that questions of difficulty and importance arise in this country. The great mass of non trading insolvents consists of Government clerks who have lived beyond their means and the settlement of whose affairs is generally speaking only too simple a matter there being in the majority of cases little or no assets to recover or distribute.

13 It may at first sight seem that the simplest mode of providing for the exercise of this jurisdiction would have been by transferring to the Small Cause Court a portion of the jurisdiction conferred on the Judges of the High Court under 11 and 12 Vic c 21 but an examination of that Statute will show that in some particulars its operation extends beyond the limits of British India and there would accordingly looking to the restricted powers of the Indian legislature be a difficulty in moulding it to suit the case. This being so it has been thought best to fall back upon the more limited provisions of the Civil Procedure Code which appear to be sufficient in the simple and comparatively unimportant class of cases we have to deal with.

The Official Assignee under 11 and 12 Vic c 21 will be Receiver in all cases under this chapter

14 The chapter on testamentary and intestate jurisdiction has been introduced with a view to relieving the High Court and at the same time providing a cheap and expeditious mode of obtaining probate or letters of administration in the case of estates of less than Rs 1 000 in amount or value

15 The seventy second section which prohibits the bringing of a suit to enforce a decree of a Small Cause Court merely affirms what has been held by the Calcutta High Court in a recent case to be the existing law

16 The Bill it will be observed though it comprises certain subjects not provided for by the existing Acts contains a much smaller number of sections than they do This is due chiefly to the omission of matters provided for by the sections of the Code of Civil Procedure which it is proposed to apply or by the general law but partly also to the omission of certain matters e g the security to be given by ministerial officers and the mode of keeping the accounts of the Court which in accordance with the practice of recent years are left to be dealt with by the Executive Government in accordance with the ordinary departmental rules

NOTE

Barometric Pressure—The pressures in column 2 of the above table for all stations below 500 feet are reduced from those given in column 3 of the table on the previous page, by adding the weight of a column of air of the temperatures given in column 18. For stations above 500 feet elevation the reduction is made by Captain Allan Cunningham's table, 'Prof. Papers on Indian Engineering, No. OXIII'. The temperatures at the sea level are taken from column 3 of the above table.

Temperature—The temperatures in column 3 are reduced from those in column 18 on the preceding page by adding 1° Fahrenheit for every 450 feet.

Wind Resultant—The resultant wind direction and its comparative predominance are calculated from the whole number of wind observations recorded during the month. The relative predominance in the direction of the resultant is given as a percentage of the whole number of observations. The direction is computed in the usual way by Lambert's formula.

Cloud—This column gives the average proportion of clouded sky, a cloudless sky being indicated by 0, and one completely overcast by 10.

The above, being all comparable, afford the data for constructing a meteorological chart for the month, which will show the isobaric and isothermal lines and the resultant wind directions, which last may be represented by arrows of varying length proportioned to the prevalence of the wind. To these may be added the rainfall from the previous tables.

The mean pressure temperature &c are deduced from observations made at 6h 10h 16h and 22h, and from the traces of the barograph and the miograph

The maximum and minimum temperatures are obtained from self registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86, formerly at the Surveyor General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The direction and movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory) The barometer is about 3 feet higher at Alipore and other things being equal, reads therefore 003 lower The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 103° lower and finally, the thermometer, which has furnished the record of temperature at the Surveyor General's Office during the last 20 years and upwards is found to read 0 6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory

Remarks on Traffic of the East Indian Railway for the month ending 28th August 1880

The pig iron traffic to the rivers Ganges and Jamuna was good at this season in 1879 but did not commence this year until later and decreases are apparent at Benares (for 3 a) Benares Agra and Hattara.
The goods traffic shows a decrease of close on 6 per cent in weight carried and 9 per cent in receipts.
The staple statement exhibits the following fluctuations —

Increases

Cotton
Chest
Iron
Jute
Ice goods
Salt
Sugar
Seeds

Decreases

Beer
Chest
Grain
Spelter

Increases

Cotton
The demand for this article is still dominant and for Europe no business has been done during the earlier weeks of the month however the steamers for China took away about 6 000 bales.
Ghee
A larger demand in Bengal has led to increased exportation of ghee from Calcutta and other stations in the North West.
Iron
This is an ordinary fluctuation due probably to the season of the year when business is generally dull in other articles.
Ice
A brisk demand in Calcutta from America led to an increase in prices.
Ice goods
There appears to have been a considerable demand throughout Bengal and the North West during the month.
Salt
This is an increase of 36 per cent in weight carried but 20 per cent in earnings.
Sugar
Owing to good demand in Rangoon and the Punjab a large quantity of inferior sugar found its way to Agra and via Gazeenabad.
Seeds
Large despatches of oil seeds have been sent off from Patna and below during the month owing to a better demand in Calcutta for export.

Report on the Fluctuations in Traffic on the Northern Bengal State Railway for the month of August 1880

GENERAL REMARKS

THE large decrease in the weight of jute carried during the month compared with the same month last year fully bears out the remarks made in last month's report and when the immense quantity of jute produced this year throughout the port of the country as compared with last is borne in mind the decrease assumes rather a serious aspect as tending to show that the increased rate has had the effect of driving the traffic from the line.

The falling off in round figures is 36 per cent whereas double the weight lifted last year might reasonably (with the larger crop) have been looked for.

Increases

Alc Mds 273
In the month of August 1879 505 maunds only were carried under this head. During the month under review 778 maunds have passed over the line the whole of which except 3 maunds was up traffic.

Food grain Mds 10 457
The demand for rice for shipment to Australia and the Cape has tended to keep up despatches from this district during the month the result being (as shown) an increase of 10 457 maunds.

Ginger Mds 462
There has been a slight demand for supplying country traders. The stocks of this article in this district are said to be very large but the prices ruling at the Port for months past has left little margin for profit.

Piece goods Mds 1 452
This traffic has been influenced during the month by the approaching Loogah holidays.

Salt Mds 18 4 5
The total weight carried during the month stands at 26 704 maunds i.e. considerably more than double the traffic for the same month last year.

Sugar Mds 93
The flow of traffic in this staple still continues in the same direction (up) and the weight lifted is purely for local consumption.

Tea Mds 3 221
The total weight carried during the month stands at 13 297 maunds and the increase this gives over August 1879 may be put down to the much larger quantity of tea manufactured this year.

Tobacco Mds 7 134

Although this increase over and above the traffic in August 1879 is most satisfactory being over 89 per cent it will be seen on reference to the comparative statement below that there has been a falling off as compared with last month a sign that the waterway is again with the line

All other goods

Mds 2,445

The traffic carried in the month although showing an increase over the corresponding month of last year has been seriously affected by the heavy rain throughout the month as will be seen on reference to the weight carried in previous month

Decreases

Gunny bags

Mds 612

There was a falling off of speculative buying going on during the latter part of June and beginning of August by natives in view of a falling off in the Deccan but prospects looking more hopeful caused a sudden cessation and despatches of hand made bags were withheld

It is

Mds 10,454

This decrease has been dealt with in general remarks

27 Whenever the revenue annually payable in respect of any estate or the rent annually payable in respect of any tenure does not exceed the sum of one hundred rupees the Collector may without issuing any notice for such estate or tenure—

(a) in any case determine the annual value of the land comprised therein to be in a permanently settled estate or tenure a sum not exceeding three times and in a temporarily settled estate or tenure a sum not exceeding twice the amount of the annual revenue or rent payable therefor or

(b) when the area of the said estate or tenure has been ascertained, determine the annual value of such estate or tenure to be at such rate per acre as to him shall seem fit

28 When the area of any revenue free estate or rent free tenure the gross rental of which does not exceed or is not estimated by the Collector to exceed, the sum of one hundred rupees has been ascertained the Collector may without issuing any notice for such estate or tenure determine the annual value of such estate or tenure to be at such rate per acre as to him may seem fit

29 When the land contained in any estate or tenure has been summarily valued by the Collector in the manner provided by clause (a) of section 27 the annual value of any portion of such land which is comprised within a tenure subordinate to such estate or tenure shall be determined according to the following rules—

(1) —When the subordinate tenure comprises the whole of the estate or superior tenure the annual value of the subordinate tenure shall be taken to be the same as that of the estate or superior tenure

Example—An estate paying a revenue of Rs 80 is summarily valued by the Collector under clause (a) of section 27 at Rs 200. The whole estate is let in part for a rent of Rs 120. The annual value of the part tenure will be Rs 200.

(2) —When the subordinate tenure comprises a part only of the land constituting the estate or superior tenure—

(a) The difference between the annual value of the estate or superior tenure, and the revenue or rent payable in respect of such estate or superior tenure shall first be ascertained.

(b) Next the ratio which such difference bears to such revenue or rent shall be ascertained.

(c) Then the amount which bears the same ratio to the rent payable in respect of the subordinate tenure shall be ascertained.

(d) Half of the amount so ascertained shall be added to the rent payable in respect of the subordinate tenure, and

the result shall be taken to be the annual value of the subordinate tenure.

Example A—An estate paying revenue of Rs 60 is summarily valued by the Collector under clause (a) of section 27 at Rs 100. A part only of the estate is let in part for a rent of Rs 37 8.

The difference between the annual value of the estate (Rs 100) and the revenue paid in respect of it (Rs 60) is Rs 40. This difference bears a ratio of two-thirds to this revenue (Rs 60).

The amount which bears the same ratio (two thirds) to the rent payable in respect of the patni (Rs 37 8) is Rs 25

add half of Rs 25 to the rent payable in respect of the patni tenure and the result (Rs 37 8 + Rs 12 8 =) Rs 50 will be the annual value of the patni tenure

Example B—Within the patni tenure paying a rent of Rs 37 8 as in example A is a darpatni tenure paying a rent of Rs 27

The difference between the annual value of the patni tenure ascertained above (Rs 50) and the rent payable in respect of the patni (Rs 37 8) is Rs 12 8 which bears a rate of one third to the said rent

The amount which bears the same ratio (one third) to the rent payable in respect of the darpatni (Rs 27) is Rs 9

add half of Rs 9 to the rent payable in respect of the darpatni and the result (Rs 27 + Rs 4 5 =) Rs 31 8 will be the annual value of the darpatni tenure

30 When the land contained in any estate or tenure has been summarily valued according to a rate per acre under clause (b) of section 27 or under section 28 the annual value of the land comprised in any subordinate tenure shall be taken at the same rate per acre as that of the estate or superior tenure

31 The holder of any estate or tenure which has been summarily valued under section 27 or 28 may within one month from the posting of the valuation roll in respect thereof under section 35 lodge a return in the form in Schedule (A) contained in regard to such estate or tenure and thereupon such return shall be deemed to be a return made as required by section 16 and shall be dealt with accordingly

32 Instead of proceeding to value any estate or tenure summarily under the provisions of section 27 or 28 the Collector may if he thinks fit cause a notice to be served in respect of any such estate or tenure in the form No I in Schedule (B) contained or in the form No II in the said Schedule contained as the case may be and thereupon all the provisions of this Part shall apply in the same way as they would have applied if the annual Government revenue or rent payable in respect of such estate or tenure had exceeded one hundred rupees

Lands used for Tea, Coffee or Cinchona

33 In the case of lands acquired under any rules issued by or under the authority of the Government for the sale lease grant or clearance of waste lands or held directly from Government and used for the cultivation of tea, coffee, or cinchona the Collector shall in lieu of the notice prescribed by section 16 cause a notice to be served calling on the holder of such lands to lodge within two months of the service of such notice a return in the form in Schedule (C) contained giving the particulars in such form set forth and the annual value of such lands shall be fixed at ten rupees in respect of every acre therein entered as cultivated unless the Board of Revenue shall in any particular case prescribe a lower rate. The provisions of sections 18 and 21 shall apply to all lands in respect of which a notice has been issued under this section

Publication of Valuation Rolls and Duration of Valuations

34 Whenever any valuation or revaluation is made under this Part the Collector shall cause to be prepared from the returns furnished to him and from the valuations made by him in accordance with this Act a valuation roll of each estate within his district and of the tenures therein comprised noting thereon for each estate the amount of revenue annually payable to Government on which the deduction specified in section 11 is to be calculated

On the application of any holder of an estate or tenure or holding and on payment of such copying fee as the Board of Revenue shall from time to time determine the Collector shall cause to be furnished to such holder a copy or corrected copy of so much of any such returns and of any such roll as relates to the lands included within his estate tenure or holding

35 On the completion of every roll prescribed under this Part, the Collector shall cause a copy thereof to be posted up at the māl cutcherry of the estate to which such roll refers and shall cause extracts of such portions of any such roll as refer to any tenure to be posted up at the māl cutcherry of such tenure

Provided that if no such māl cutcherry be found such roll and such extracts shall be posted up at some conspicuous places on the estate and tenures respectively to which they refer and that if such estate or tenure cannot be found such roll and such extracts shall be posted at some conspicuous place in any village in which such estate or tenure is believed to be situated

The person who is entrusted with the publication of any such return shall obtain an acknowledgment in writing signed by two persons who may be either respectable residents of the neighbourhood or chowkidars or other officers of Government to the effect that such return was duly published on the spot and shall give in such acknowledgment to the Collector

36 Except as otherwise in this Part expressly provided every valuation and revaluation made under this Chapter shall remain in force for the term of five years from the date fixed by the Lieutenant Governor under section 12 as the date from which the cess leviable in pursuance thereof shall take effect and thereafter until another revaluation and assessment in substitution therefor shall have been ordered and completed

37 Nothing in section 36 contained shall be held to deprive the Collector with the sanction of the Board of Revenue from making at any time any reduction which he may think fit in the valuation of any estate or tenure

or from making a valuation of and assessing and levying cess under the rules laid down in this Part upon any estate or tenure which for any reason whatever has been omitted from the valuations and assessments for the time being in force or which was not in existence when such valuation or assessment was made

Provided that such holder shall have paid to the Collector all sums due to such collector up to date in respect of road cess and public works cess and not otherwise

60 Such Supplementary Return shall to all intents and purposes have the same effect as a return duly made under the provisions of section 51 and sections 51 to 56 (both inclusive) shall be applicable to and in respect of any rent free land included in such supplementary return

61 The provisions of sections 57 and 58 shall be applicable to every amount which as provided in section 56 may become payable by the owner and holder of any such rent free land to the holder of any such estate or tenure after the fulfilment of the requirements in sections 52, 53 and 54 contained

62 The provisions of section 58 shall not be applicable to any such amount which may have become so payable under the provisions of Bengal Act X of 1871 or of this Act before the fulfilment of the requirements of the sections 52, 53 and 54 but when any instalment of cess which may have become payable before the fulfilment of such requirements has not been paid to the holder of such estate or tenure on the date on which such instalment was payable the holder of such estate or tenure may recover the amount of such instalment together with interest at the rate of twelve and a half per centum per annum on such amount and with all costs of suit

65 Whenever any occupier of land which is held rent free by the owner thereof shall have paid any sum as cess due in respect of such land to any holder of an estate or tenure to whom such cess is payable such occupier shall be entitled to deduct the sum so paid by him from the rent next thereafter payable by him to the owner of such land, until such sum is fully adjusted.

66 Notwithstanding anything in this Chapter contained the Collector may at any time cause a notice as mentioned in section 16 to be served on the holder of any rent free land which he shall consider not to have been entered in the return of any estate or tenure in which such land ought to have been included under the provisions of section 51. Such notice shall require the holder of such land to lodge at the office of the said Collector a return in the form in Schedule (A) contained in respect of such land.

and on service of such notice the provisions of this Chapter shall no longer apply to such lands but the same consequences shall ensue and the same liabilities shall attach to the holder of such land as would have ensued and would have attached if such lands had constituted a revenue free estate.

If the Collector has reason to believe that any land in respect of which he determines to serve such notice has been included in the return of any estate or tenure he shall give notice of his intention to the holder of such estate or tenure, and shall alter such return as may be requisite and shall correct the valuation and assessment of such estate or tenure as may be required.

68 On receipt of such information whether within the time prescribed or after the expiration thereof the Collector may by an order in writing require such owner or holder to make a return of his land in the form in Schedule (A) contained or, if the gross rental of such land does not exceed one hundred rupees may order that such land shall be summarily valued under section 27 or section 28 and may proceed to make such valuation.

69 Every order made by a Collector under the last preceding section shall have the same effect and be followed by the same consequences as the issue of a notice by the Collector under section 66.

70 As soon as any rent free land which had not previously been included in the valuation of any estate or tenure has been valued by the Collector after the issue of a notice as provided in section 66 or after an order made under section 68 the holder of such land shall become liable to pay to the Collector the road cess and the public works cess due on such land, in accordance with such valuation for the three years last preceding such valuation at the full rates at which such cesses were respectively levied for each such year in the district generally together with interest calculated at twelve and a half per centum per annum on each instalment from the date on which such instalment would have been payable if such valuation had been in force.

PART VI Bills of the India Council

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT

[Third Publication]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 10th September 1880 and was referred to a Select Committee —

No 18 of 1880

A Bill to enhance the rate of Port dues leviable at Madras

WHEREAS it has been determined to construct an artificial harbour for the port of Madras and to defray a portion of the interest on the principal sum expended on the construction of such harbour and of the annual expenses of maintaining the same out of the dues leviable on sea going vessels of fifteen tons and upwards entering the said port

And whereas the maximum rate of such dues is fixed by the Indian Ports Act 1875 section forty five and the third part of the first schedule thereto annexed, and the amount of such rate is insufficient to defray such portion of the said interest and expenses in addition to the other charges to meet which the said dues are applicable

And whereas it is therefore necessary to enhance to the extent hereinafter mentioned the maximum rate of dues so leviable

It is hereby enacted as follows —

1 This Act may be called 'The Madras Port dues Act 1880' and

It shall come into force as soon as the said harbour is in the opinion of the local Government open

for the use of sea going vessels of fifteen tons and upwards and the said Government has published, in the *Fort St George Gazette*, a notification to that effect

2 In the Indian Ports Act 1875 first Schedule, Part III the following amendments shall be made, that is to say—

(a) in the first column the numeral and word "9 Madras" shall be omitted,

(b) in the first column above the heading "*Eastern Group*," the word "Madras" shall be inserted and

(c) opposite the word "Madras" so inserted there shall be inserted—

(1) in the second column the words "sea going vessels of fifteen tons and upwards," and

(2) in the third column the words "not exceeding eight annas per ton" Provided that in the case of vessels employed in the coasting trade not being steamers the rates shall be one half the rates chargeable in respect of other vessels

STATEMENT OF OBJECTS AND REASONS

The funds requisite for the construction of the artificial harbour at Madras are being advanced by the Government

It is estimated that the whole cost of the work will amount to Rs 62 80 000 and it is proposed to raise by taxation levied on the trade of the port an annual income sufficient to pay interest at 4 per cent on this sum together with Rs 60 000 the estimated annual charge for maintenance

Port dues at the rate of 3 annas (or in the case of coasting vessels 1½ annas) per ton can at present be levied under the Indian Ports Act 1875 on vessels entering the port and the simplest mode of raising the requisite income would be by an enhancement of those dues. It is however manifest that they could not be enhanced beyond a certain point without injuriously affecting the trading trade of the port and it has accordingly been determined after reference to the Madras Chamber of Commerce that the best course to take will be to raise only a portion of that income in the shape of Port dues leaving the rest to be raised by a tax on goods landed and shipped the precise form of which will be settled hereafter. In accordance with this determination the present Bill has been prepared. It admits of the Port dues being raised to eight annas per ton or in the case of vessels employed in the coasting trade and not being steamers to four annas. The additional income which may be obtained by so raising them is estimated at Rs 1 60 000 per annum

The Bill is drawn so as not to come into operation till the new harbour is open

These examinations shall be open to any person serving or about to serve in the Mercantile Marine. and thereupon such person shall be deemed to be a tenure holder for the purposes of the assess-

ment and levy of the cesses in respect of the lands held by him

27 Whenever the revenue annually payable in respect of any estate or the rent annually payable in respect of any tenure does not exceed the sum of one hundred rupees the Collector may without issuing any notice for such estate or tenure—

29 When the land contained in any estate or tenure has been summarily valued by the Collector in the manner provided by clause (a) of section 27, the annual value of any portion of such land which is comprised within a tenure subordinate to such estate or tenure shall be determined according to the following rules—

(1) —When the subordinate tenure comprises the whole of the estate or superior tenure, the annual value of the subordinate tenure shall be taken to be the same as that of the estate or superior tenure

Example—An estate paying a revenue of Rs 80 is summarily valued by the Collector under clause (a) of section 27 at Rs 200. The whole estate is let in part for a rent of Rs 120. The annual value of the part tenure will be Rs 200.

(2) —When the subordinate tenure comprises a part only of the land constituting the estate or superior tenure—

(a) The difference between the annual value of the estate or superior tenure, and the revenue or rent payable in respect of such estate or superior tenure shall first be ascertained

(b) Next the ratio which such difference bears to such revenue or rent shall be ascertained

(c) Then the amount which bears the same ratio to the rent payable in respect of the subordinate tenure shall be ascertained

(d) Half of the amount so ascertained shall be added to the rent payable in respect of the subordinate tenure, and

the result shall be taken to be the annual value of the subordinate tenure

Example—An estate paying revenue of Rs 60 is summarily valued by the Collector under clause (a) of section 27 at Rs 100. A part only of the estate is let in part for a rent of Rs 37 8.

The difference between the annual value of the estate (Rs 100) and the revenue paid in respect of it (Rs 60) is Rs 40. This difference bears a ratio of two thirds to this revenue (Rs 60).

The amount which bears the same ratio (two thirds) to the rent payable in respect of the patni (Rs 37 8) is Rs 25

add half of Rs 25 to the rent payable in respect of the patni tenure and the result (Rs 37 8 + Rs 12 8 =) Rs 50 will be the annual value of the patni tenure

Example B—Within the patni tenure paying a rent of Rs 37 8 as in example A is a darpadni tenure paying a rent of Rs 27

The difference between the annual value of the patni tenure ascertained as above (Rs 50) and the rent payable in respect of the patni (Rs 37 8) is Rs 12 8 which bears a rate of one third to the said rent

The amount which bears the same ratio (one third) to the rent payable in respect of the darpadni (Rs 27) is Rs 9

add half of Rs 9 to the rent payable in respect of the darpadni and the result (Rs 27 + Rs 4 9 =) Rs 31 8 will be the annual value of the darpadni tenure

30 When the land contained in any estate or

tenure has been summarily valued according to a rate per acre under clause (b) of section 27 or under section 28 the annual value of the land comprised in any subordinate tenure shall be taken at the same rate per acre as that of the estate or superior tenure

31 The holder of any estate or tenure

which has been summarily valued under section 27 or 28 may within one month

from the posting of the valuation roll in respect thereof under section 35 lodge a return in the form in Schedule (A) contained in regard to such estate or tenure and thereupon such return shall be deemed to be a return made as required by section 16 and shall be dealt with accordingly

32 Instead of proceeding to value any estate or tenure summarily under the provisions of section 27 or 28 the collector may if he think

it fit cause a notice to be served in respect of any such estate or tenure in the form No 1 in Schedule (B) contained or in the form No 2 in the said Schedule contained as the case may be and thereupon all the provisions of this Part shall apply in the same way as they would have applied if the annual Government revenue or rent payable in respect of such estate or tenure had exceeded one hundred rupees

(2)—Whenever any such separate account is opened after the valuation of an estate and while such valuation remains in force the Collector shall issue a notice on the holders of the shares severally in respect of which the accounts are to be kept separately informing them that unless any objection is preferred to the Collector within one month of the service of such notice the amount of the cesses which the whole estate is liable to pay according to the existing valuation will from the date on which such separate accounts were opened, be apportioned among such shares severally in proportion to the amount of Government revenue for the payment of which each such share is entered in the separate accounts as being liable. Such notice shall specify such proportionate amount.

(3)—If no such objection be preferred within the time specified such proportionate amount shall be the amount of the cesses for which the respective holders of such several shares are primarily liable as mentioned in Section 13 of Act VI of 1859 subject however to the general responsibility of the holders of the entire estate as mentioned in Section 14 of the said Act if the amount of the cesses due on account of any such share cannot be recovered as provided in Sections 98 and 99 of this Act from the holders of such share.

(1)—If any such objection shall be preferred as aforesaid the total amount of the cesses for which the whole estate is liable according to the existing valuation shall be apportioned among the several shares in respect of which such separate accounts are opened in proportion to the annual value of such shares respectively under such rules or special instructions not being inconsistent with this Act as may be issued by the Board of Revenue and the holders of such several shares shall be primarily liable as aforesaid for the payment of the amount of the cesses so apportioned on their shares respectively.

45 If any instalment of road cess or public works cess or part thereof payable to the Collector shall not be paid within fifteen days from the date on which the same becomes due the amount of such instalment or part thereof may be recovered at any time within three years after it became due with interest at the rate of twelve per centum per annum calculated from the date on which such instalment became due and with all costs of recovering the same.

46 (1)—In any district to which the Lieutenant Governor may specially order that the provisions of this section shall be extended it shall be lawful for the Collector to keep a separate account in respect of the amount of cesses payable and paid by any holder of a revenue free estate who is recorded in Part I of the Collector's general register of revenue free lands as proprietor or manager of any specified share or interest in any revenue free property.

(2)—Such separate account shall be opened and kept under such rules as to the levy of fees and other matters, and subject to such conditions and in such manner as the Board of Revenue may from time to time prescribe and the Board of Revenue may at any time order that any separate account which has been so opened shall be closed from such time as they may direct and no longer kept as a separate account.

(3)—As long as any separate account shall remain open as provided in the preceding section and no longer the joint liability of the holders of such revenue free estate for payment of the entire amount payable in respect of such estate shall cease and the Collector shall recover the amount of cess or other demand due in respect of each share or interest for which an account has been so separately kept from the holder or holders of such share or interest only and if the Collector shall think fit to proceed under section 99 he shall take action under that section against the share or interest only in respect of which the sum demanded is due and the rents thereof.

47 Every holder of an estate or tenure to which by holders of whom any sum may be payable under the provisions of this Act may recover the same with interest at the rate of twelve and a half per centum per annum in the same manner and under the same penalties as if the same were arrears of rent due to him.

48 Any shareholder in an estate or tenure who may have paid the road cess or public works cess payable in respect of such estate or tenure, or any part thereof in excess of the amount proportionate to his own interest in such estate or tenure may recover from his co-sharers such sums as he may have paid on account of their respective shares and interests in the same manner and under similar penalties or may take credit for such sums in any adjustment of accounts between himself and his co-sharers.

49 Whenever any shareholder in an estate who is recorded in the general register of revenue paying and revenue free lands maintained by the Collector or whenever any shareholder in an estate the extent of whose share or interest in such estate is recorded in any other register kept up by the Collector of lands paying revenue or rent to the Collector direct shall have paid the road cess or public works cess payable in respect of such estate or any part thereof in excess of the amount proportionate to his own interest in such estate, he may, within fifteen days of such payment being made move the Collector to make a certificate as provided by any law for the time being in force for the recovery of Public Demands specifying the amount which has been paid in by such shareholder as cess in respect of the recorded share or interest of any other shareholder in the estate,

and thereupon such Collector may if he think fit make such certificate, and such certificate shall have the same effect as a certificate made for the recovery of a Public Demand and the same notices shall be issued and the same proceedings may be taken thereon by the Collector as in case of such certificate.

Provided that the person in whose favour the certificate has been made shall be deemed

to be the decree holder for the sum mentioned in the certificate and all proceedings taken by the Collector for the recovery of the sums mentioned in the certificate shall be taken at the instance of the person in whose favour the certificate has been made, and at his cost, and on his responsibility, and not otherwise,

Provided also that if any person against whom such certificate has been made shall object that the amount of the cesses for the recovery of which the certificate has been made is greater than the amount which the applicant for the certificate would recover from such person in a civil court as being equitably payable in respect of such person's share or interest in the estate, and if in the opinion of the Collector there is probable ground for such objection the Collector may, if he see fit cancel such certificate and leave the applicant to his remedy in the civil court

have been fulfilled, in respect of any such land which is included in any such supplementary return, every owner and holder of such

land and every person in receipt of the rents and profits or in possession and enjoyment of such land shall be bound to pay the amount of the road cess and public works cess which may thereafter

Such notice shall require the holder of such land to lodge at the office of the said Collector a return in the form in Schedule (A) contained in respect of such land.

and on service of such notice the provisions of this Chapter shall no longer apply to such lands but the same consequences shall ensue and the same liabilities shall attach to the holder of such land as would have ensued and would have attached if such lands had constituted a revenue free estate.

If the Collector has reason to believe that any land in respect of which he determines to serve such notice has been included in the return of any estate or tenure he shall give notice of his intention to the holder of such estate or tenure, and shall alter such return as may be requisite, and shall correct the valuation and assessment of such estate or tenure as may be required.

REVENUE EARNINGS AND EXPENSES OF THE BENGAL PROVINCIAL RAILWAYS FOR THE HALF YEAR ENDED 30th JUNE 1880

No 813 816A —S R, dated Darjiling, the 11th October 1880

GOVERNMENT OF BENGAL

PUBLIC WORKS DEPARTMENT — RAILWAY

READ—

The Revenue Accounts of the Northern Bengal Tirhoot Patna and Gya and Calcutta and South Eastern and Nalhati State Railways, for the half year ended 30th June 1880

OBSERVATIONS—The total revenue receipts from these lines during the half year under review amounted to Rs 14,12,996, against Rs 10,45,047 during the first half of 1879, or an increase of 35 20 per cent. It must, however, be remembered that during the period under review there was a greater length of railway open, viz the Teesta extension of the Northern Bengal State Railway, 11 miles opened on 1st June 1879, and the Patna and Gya State Railway, which was not properly opened till June 1879. Still, however, on the whole, the increase in the receipts is satisfactory.

2 The revenue expenses amounted to Rs 9,09,516, against Rs 8,18,272 during the corresponding period of previous year. The chief increase in the working expenses occurred on the Patna and Gya State Railway, the comparison being Rs 21,228 in the first half of 1879, against Rs 1,36,498 in 1880 which is of course due to the extra length of line open. The Northern Bengal and Tirhoot State Railways, with an increase of 11 miles on the former, and the same mileage on the latter, have shown a decrease in their working expenses in comparison with the corresponding period of the previous year, which is satisfactory.

3 The net earnings amount to Rs 5,03,480, against Rs 2,26,360 during the first half of 1879 or an increase of 122 13 per cent.

4 The total capital expenditure up to the end of June has amounted to Rs 2,85,23,813, or, including charges under suspense, Rs 3,01,06,808. The total profits realized pay a percentage for the half year of 1 77 on the former outlay and 1 67 on the latter, and the net charge falling on Provincial revenues to make good the guaranteed interest of $4\frac{1}{2}$ per cent to the Imperial Government will be only 58 per cent.

5 Appended to this Resolution is a tabulated statement giving the chief figures of the working of the Provincial Railways for the half years ended 30th June 1879 and 1880.

ORDER—Ordered that a copy of this be forwarded to the Financial Department of this Government, and to the Managers of the Bengal Provincial Railways, for information.

Ordered also that this be published for general information in the *Calcutta Gazette*.

The maximum and minimum temperatures are obtained from self registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. The barometer readings are corrected approximately to those of the standard Newmann's No 86 formerly at the Surveyor General's Office.

The hygrometric elements are obtained from tables III IV and V of the official tables computed in the Meteorological Office and based on Regnault's indications of August's formula.

The direction and movement of the wind are taken from the trace of a Beckley's anemograph.

Manufacture of Salt

1 Every application for a license to manufacture salt under the provisions of section 7 of Act VII (B C) of 1864, shall be presented to the Collector of the district where

the manufacture is intended to be carried on who shall forward it to the Board of Revenue through the Commissioner of the Division with an expression of his opinion as to whether the application should be granted or not. In the former case after ascertaining the boundaries within which the manufacture is to be carried on and the area of the land the Collector should consult with the District Superintendent of Police and report the strength and cost of the preventive guard which should be entertained in the latter full reasons for rejecting the application should be recorded. Where the license is recommended for sanction the stamp for the license should be realized and remitted or a certificate given of the amount being credited in the treasury accounts.

2 The Board of Revenue shall have full power to approve or to reject any such application for the manufacture of salt, and the orders of the Board shall be final.

3 Immediately upon any application for license to manufacture salt being sanctioned the applicant shall execute an agreement (Form I, appendix) and shall thereupon receive from the Board of Revenue a license (Form 2 appendix) the currency of which shall not extend beyond one year.

4 In addition to the preventive guard to be appointed subject to the approval of the Board with a view to prevent smuggling and to protect the revenue the Collector shall appoint in every case subject to the approval and control of the Commissioner an excise establishment as marginally noted for the purpose of supervising the weighing of the salt prior to removal to the warehouse. The Pass Officer shall be called upon to furnish such security as may be required by the Board of Revenue and he shall nominate for the Collector's approval the Mohuris to be appointed under his own responsibility. The Board of

Revenue shall have full power at their discretion to modify or increase the cost and strength of the excise establishment when necessary.

5 The pay of the preventive guard and of the excise establishment shall be defrayed by the manufacturer and shall be disbursed by the Collector who will be held responsible that the necessary amount is paid to him or to any one whom he may appoint to receive it on or before the fifteenth day preceding the close of the month for which it is due. The payment of the sum fixed forms one of the conditions on which the license specified in Rule 3 is granted and should be provided for in the agreement mentioned in the same rule a clause being inserted to the effect that on default of such payment within the specified time the license may be cancelled and all salt manufactured under the license at the place of manufacture attached and confiscated. The salt so confiscated should be sold by auction at the highest price bid above the duty and the sale proceeds should be applied after paying the duty to defray the charges on account of the guard and excise establishment and the costs incurred the balance being made over to the defaulter. If the proceeds should not suffice to pay the duty and charges the balance may be realized by the sale of any other salt belonging to the defaulter.

In Orissa and the district of Midnapore however the cost of these establishments will be defrayed by Government except in cases in which the outturn of the manufacture yields a revenue less than 20 times the cost of establishment when the cost shall be defrayed by the manufacturer.

6 Before manufacture is allowed to commence the land within which the actual manufacture is to be carried on must be carefully marked out by a shallow trench all necessary arrangements must be made and concluded in regard to the appointment of the preventive guards and excise officers and as required by section 10 Act VII (B.C.) of 1864, a proper and secure warehouse must be provided by the manufacturer and be approved of by the Board of Revenue. The manufacturer should give six days notice of the date on which he intends to commence manufacture and the pay of the guard shall commence from that date. He should also notify the date of close of manufacture and the appliances of manufacture should be either removed or destroyed and until they are so removed or destroyed the manufacturer will be required to pay for the guard. Suitable huts should be provided and kept in repair by the manufacturer for the use of the guard failing which the Collector may build and repair such huts and levy the cost by sale of the salt or cancel the license as for a default in payment of wages.

7 The Collector should ascertain how much salt each chula or furnace can produce in a working day and the Pass Officer must insist on the chula or mate in charge of each furnace sending that quantity to the chatee or depot. The day's outturn should be brought to the depot at a fixed hour from one hour before sunset till sunset. The Pass Officer should receive the salt and measure it in standard baskets applied by the Collector and make a note of which furnaces it comes from so as to secure the full complement from each furnace. If any furnace falls short of the ascertained quantity the mate of that furnace should be called to account. The standard basket shall contain exactly one maund of 40 seers at 80 tollahs to the seer.

8 The Pass Officer shall send to the Collector daily a copy of his record showing how many baskets of salt have been received at the depot. This record shall be kept in cheque books similar to those used by Pass Officers for protection of salt on its way to the aurungs.

9 The manufacture of salt shall be closed on such date as the Board of Revenue may be pleased to prescribe in each case the date being specified in the license of each manufacturer. All salt manufactured after that date shall be held to be salt manufactured without a

license and the provisions of sections 5 and 6, Act VII (B C) of 1864 shall apply to such salt and to its manufacturer. The license also shall be liable to be cancelled.

10 Within one month from the date of the closing of his manufacture every licensed manufacturer of salt shall notify to the Collector for the information of the Board of Revenue, the quantity of salt manufactured by him during the season. Should the manufacturer without sufficient cause fail to give this information within the prescribed period or should he wilfully furnish incorrect information he shall be liable to a fine not exceeding Rs 500 and in the latter case all salt in excess of the quantity notified by him shall be held to be contraband and shall be liable to seizure and confiscation as such. The license also shall be liable to be cancelled.

Deposit of Salt

11 The Board of Revenue may appoint the Collector of the district or other officer specially selected for the purpose to exercise a general control and supervision over all warehouses provided by manufacturers of salt under the requirements of section 10 of Act VII (B C) of 1864. For each warehouse the Collector shall appoint subject to the approval and control of the Commissioner an excise establishment as marginally noted the cost of such establishment to be paid by the manufacturer. The Darogah shall be called on to furnish security of such amount as may be required by the Board of Revenue and all the provisions of Rule 5 with regard to the payment of the salary of the establishments therein provided for with regard to the duties and responsibilities of the Collector and with regard to the realization of arrears of salary shall be applicable in the case of establishments appointed under this rule. The Board of Revenue shall have full power at their discretion to modify the scale of establishment when there are two or more warehouses in the same or adjacent places. No warehouse shall be approved unless on measurement it be found capable of containing at least 10 000 maunds of salt.

12 All salt manufactured under excise license which may remain unstored at the salt works fifteen days after the date fixed in the license for the closing of the manufacture shall unless the storage thereof shall have been unavoidably prevented be destroyed by the officers appointed under Rule 4.

13 Every warehouse when approved of by the Board of Revenue shall be regularly licensed and every manufacturer shall forthwith cause to be painted or otherwise exhibited in a conspicuous part of the exterior of such warehouse the number of the license the year in which it was granted and the words *Licensed Warehouse* in the vernacular language and character of the district. Before a warehouse is built the proposed site should be approved by the Collector of the district. Suitable huts should be provided and kept in repair by the manufacturer for the use of the warehouse establishment failing which the Collector may build and repair such huts and levy the cost by sale of the salt or cancel the golah license as for a default in payment of wages. The Commissioner of the Division may from time to time cause any licensed warehouse to be inspected by the Collector of the district or other officer appointed under Rule 11 and should it appear that from want of repair or from any other cause such warehouse has become an unfit receptacle for the storage of salt may require the manufacturer to repair or otherwise render it fit for that purpose and in the event of his failing so to do may cancel the license of such warehouse. In the absence of special orders directing an inspection District Collectors are required to visit each warehouse at least twice in the course of a year or to depute an Assistant or Deputy Collector for the purpose. SECTION VIII —RULES RELATIVE TO THE RECEPTION AND CLEARANCE OF SALT SUBSIDIARY TO THOSE CONTAINED IN ACT VIII OF 1878

Rules for Weighment and Admission of salt into Warehouses public or private under the Customs Law

1 On receipt of an application under section 91 Act VIII of 1878 for the admission of salt into a public or private warehouse and after the due execution of a bond under the provisions of section 92, Act VIII of 1878 the Collector of Customs shall make such arrangements as he may deem necessary for the proper weighment of salt during its discharge from the vessel for the purpose of being conveyed to the appointed licensed warehouse

2 The weighment shall be conducted in the presence of the preventive officer on board and the expense thereof shall be charged to the tender at a rate of Rs 3 per 1 000 maunds

3 No salt for which the full duty has not been previously paid shall be taken from any vessel save in a lighter provided with hatches which are capable of being securely fastened down and it shall be the duty of the preventive officer on board to satisfy himself that such lighter is in serviceable condition before permitting such salt to be placed therein

- 4 As soon as the bonder or his agent or servant shall notify to the preventive officer that he desires to proceed with any boat load of salt he shall obtain a boat note, in which the name of the importing vessel and of the bonder the quantity of salt contained therein and the warehouse wherein it is to be deposited shall be specified. The salt shall thereupon be carefully impressed with a stamp specially provided for this purpose and the hatches shall be closed and sealed by or in the presence of the preventive officer. The lighter shall then be allowed to proceed in charge of a native officer or peon deputed for the purpose by the Custom house authorities accompanied by an agent on the part of the bonder.
- 5 The boat shall be anchored if possible at the steps of the wharf leading to the warehouse in which the salt is to be stored (otherwise at the moorings nearest to such wharf). It shall on no account be permitted by the native Custom house officer or peon on board to anchor at the outward moorings.
- 6 Notice of the arrival of such salt shall at once be given by the Custom house officer to the Government Superintendent in the case of salt to be bonded in a public warehouse or if the salt is to be bonded in a private licensed warehouse to the Inspector or Superintendent of licensed Warehouses who shall thereupon note the date and hour of arrival bringing any unreasonable delay to the notice of the Collector of Customs and depute a proper officer to examine and compare the boat note delivered by the preventive officer to the bonder his servant or agent, and the cargo of salt and to superintend its removal to and storage in, the appointed warehouse.
- 7 The bonder's agent and native Custom house officer or peon shall remain on board of the boat in charge until the seals and hatches are examined and all the cargo landed and stored.
- 8 The Bonder will be held responsible for any departure from these rules on the part of his agent and the Superintendent or Inspector of the warehouse shall take notice of any dereliction of duty on the part of the native Custom house officer or peon.
- 9 All expenses connected with the removal and storage of the salt shall be borne by the bonder who shall also pay to the Collector such fees as he may fix for the services of the officer or peon in charge of the salt from the time of its discharge from the vessel's side to the completion of its storage in the warehouse.
- 10 If the officer appointed by the Superintendent or Inspector of the Government or private licensed warehouse shall have reason to believe that the salt has in any way been tampered with during its transit by river he shall at once report the circumstance to the Superintendent or Inspector who with the permission of the Collector shall direct the salt to be reweighed and such reweighment shall be made at the expense of Government.
- 11 If there be found any unexplained deficiency in the salt on board the cargo boat as compared with the quantity specified in the boat note the whole of the salt contained in such boat shall be confiscated and the bond under which the salt is in course of being stored shall be cancelled.
- 12 Salt relating to different bonds shall be stored separately and distinctly. Any admixture of salt specified in different bonds shall render the bonds liable to cancellation and the holders to immediate payment of the full duty payable thereon.
- 13 On salt bonded in a warehouse under the exclusive control of a Government warehouse keeper the duty shall be calculated on the quantity actually delivered from such warehouse.
- 14 On salt bonded in a private licensed warehouse the duty shall be calculated on the quantity delivered on weighment from the side of the ship in which it was imported less an allowance on account of wastage which shall not in ordinary cases exceed 2½ per cent on the quantity bonded.
- 15 In any special case the Board of Revenue, as chief customs authority of the presidency is competent to direct that an increased allowance for wastage shall be granted in accordance with the provision of section 122 Act VIII of 1878.
- 16 If the Collector of Customs has any reason to believe that any fraud has been perpetrated by the bonder or owner of the salt, or any person in his employ, he shall refuse to make any allowance on account of wastage and shall demand the full duty payable on the entire quantity received into bond.
- 17 The Rs 3 per 1,000 maunds paid for the weighment of salt on shipboard under Rule 2 shall be credited to a fund to be instituted by the Collector of Customs. The Collector shall from time to time make such subsidiary arrangements as he may deem most conducive to the interests of both Government and the public for carrying on all such weighments the costs of which will be defrayed from the fund in question.

18 In the case of public warehouses, the Board of Revenue shall fix from time to time the amount of rent to be paid by the bondholder per 1000 maunds of salt. Ordinarily no golah should be made available unless the quantity of salt to be bonded is equal to two thirds of the storage which the golah is capable of containing but when accommodation in golahs of suitable dimensions is not available the rent to be demanded should be calculated on the quantity of salt which would amount to two thirds of the storage capacity of the building whatever the actual quantity of salt bonded may really be.

4 Scales and weights will be provided by Government but bondholders are required to make their own arrangements for cutting and removing their salt from the warehouses as well as to supply their own tools for cutting the salt such as *subools kodulies* &c.

There will be one Customs officer at each scale and his duty will be to keep in a book provided for the purpose at the expense of Government a correct tally of the bags as they are weighed and taken off the scale by the bondholder people as well as to see that each bag contains neither more nor less than the prescribed quantity of salt viz *two maunds*. He will be held personally liable for any excess or deficiency that may be discovered at the *check scales* provided for by the golah officers.

After the rowannah quantity has been delivered, these counters will be compared with his written tally as well as with that of the Customs officer for the purpose stated in Rule 8.

10 When discrepancies in the accounts cannot be reconciled and whenever the Superintendent has reason to believe that the quantity of salt conveyed to the boat or cart is not correctly represented in the accounts he shall hold a reweighment. The expense of such reweighment shall be borne by Government.

11 Whenever the bondholder or purchaser is desirous of removing his boats or carts from the premises the Superintendent will satisfy himself on every point before granting the usual protective document. He will before granting a pass at all times satisfy himself even where the accounts agree that the boat load or cart load represents the exact quantity entered in the rowannah.

13 Koyals and Pippavees will not be employed as heretofore in checking weighments

SECTION X.—RULES RELATING TO THE DELIVERY OF SALT FROM BOARD SHIP

The present working hours are from 8 A.M. to 5 P.M. Leave to work extra hours is only granted when the Collector sees sufficient grounds to permit it.

2 Partial deliveries are prohibited in so far as each boat load is concerned. When the loading of a boat is commenced it must be finished before the loading of another boat is commenced. If a boat's loading is commenced during extra hours it must be completed without any interruption, whether the loading is completed in regular or extra hours.

3 If by any unforeseen circumstance it should become necessary to interrupt delivery the boat partially loaded shall receive a boat note in the following form and shall remain alongside the discharging vessel subject to seizure in the event of her trying to leave the ship's side.

4 Delivery on a rowannah of more than 100 maunds should not be commenced after 1.30 P.M. so as to ensure its completion within working hours.

5 The quantity of salt covered by the rowannah first taken up must be discharged whatever the number of boat loads may be before delivery is commenced on a second Rowannah. In exceptional cases where this is impossible and adherence to the rule is calculated to cause delay and inconvenience to the ship, the preventive officers before commencing delivery on a second rowannah (the first being incomplete) shall make an immediate report to the Collector detailing the circumstances which have rendered a departure from the rule necessary. Such report shall be countersigned by the Commander or Chief Officer of the vessel and its number (if any) and date shall be entered by the preventive officers in the Tally Book.

6 The pages of all tally books shall be numbered and signed at the head by the Superintendent of the Preventive Service and as soon as each page is filled the preventive officers shall before commencing a fresh page require the Commander of the vessel or Chief Officer to sign at the foot of the page which has been written up.

7 On the completion of deliveries of salt from board ship upon rowannahs the holders thereof must present them to the Board's office for the purpose of having the endorsements made on them by the preventive officers examined. Challans will then be granted with regard to such rowannahs as would require them according to section 39 of the Government rules. This rule will not prevent salt merchants removing their salt laden boats from the ship's side to safe and convenient places in the river under the boat notes previously granted by the preventive officers. Preventive officers will invariably when they deliver a completed rowannah to a merchant or to his gomastah warn him to present his rowannah at the Board's office.

8 No salt may be landed from ship board or removed from the bonded wharves into the excepted limits of Calcutta and Howrah unless protected by a certificate (Form 12, appendix) granted by the Collector of Customs (see section 1 Rule 36A). Within 24 hours after the delivery of salt from board ship and a certificate the holder thereof must present it at the office of the Collector of Customs for the purpose of having the endorsement made on it by the preventive officer examined after which it will be returned to the holder in order that the salt covered by it may be landed.

9 The currency of each certificate will expire 48 hours from the time that delivery of the salt is completed—and any certificate which has not been finally returned under

the following rule (No 10) to the office of the Collector of Customs within 48 hours from the time of delivery of the salt must be presented within that time for renewal by the Collector

10 Within 48 hours after the landing within excepted limits of salt removed upon a certificate from board ship or from the bonded golahs the certificate must be returned to the office of the Collector of Customs with an endorsement by the holder showing the time and place of landing and the place of storage

11 Any failure to present a certificate at the Collector's office as directed in Rules 8, 9 and 10 within the time specified in each rule will be punishable with a fine of Rs 500 under section 167 clause 1 of the Sea Customs Act

SECTION XI—RULES FOR THE ADMISSION OF GANJAM SALT INTO ORISSA

4 The pass so given shall be sufficient to protect the salt specified therein from the place of sale to the place of destination provided that the latter is reached during the period of the currency of the pass and during this period no Bengal rule or law shall affect this salt or the carriers thereof

5 If owing to accident or circumstances beyond the control of the trader the salt should not be able to reach its destination within the period fixed then the pass holder shall at least one day prior to the expiry of the pass report the circumstance to the nearest police station the officer in charge of which shall unless good reason for suspecting fraud exist endorse the pass extending its period by one more than the number of days necessary to enable the salt to reach its place of destination If the officer in charge apprehends fraud he shall turn the salt and refer the case including a full statement by the pass holder to the Collector for orders If after a pass has been once extended a second application for extension should be made the case shall be referred for the orders of the Collector No salt thus detained shall be confiscated under any Bengal rule except on distinct proof of fraud but where the pass holder has wilfully overstayed the period of grace granted the Collector may if he deem it necessary impose a moderate penalty not exceeding 10 per cent on the value of the salt thus delayed in transit

6 If a pass holder shall desire to make any alterations in the terms specified in his pass he may apply to the Collector of the district in which the salt may then be and such Collector may in his discretion issue an exchange pass which for the purposes of the salt Act and of these rules shall be of the same force as the original pass issued by the Collector of Ganjam Every application to a Collector for an exchange pass shall be written upon a paper bearing a stamp of the value which the law prescribes for applications to a Collector

7 The holder of a pass may sell portions of the salt covered by such pass in transit between the Ganjam frontier and the place of destination but any salt so sold will become amenable to all rules which have been or which may be passed by the Lieutenant Governor of Bengal under section 11 Act VII (B.C.) of 1864 subject to the provisions of the following rules

A 336 dated 14th October 1880—Resolution by the Government of India No 17800 dated Simla the 14th October 1880 —

Re-arrangement of Upper Subordinates in a rank

Previous to the re-arrangement of Upper Subordinates in each grade was last fixed in 1865 and was not altered since. It was then decided that an increase in the number of subordinates in the ranks of the various branches of the Public Works Department was required in order to meet the increased demands of the service. The Government of India has been led to consider the subject afresh in connection with the increase in the number of subordinates and has arrived at the conclusion that owing to the large increase in the number of subordinates supervised by the various Branches greater responsibility has been thrown upon the Subordinates. It is therefore proposed that in this connection general grounds be laid down for further arrangement of their positions.

The re-arrangement of the number of Subordinates in each rank of the various Branches of the Public Works Department will be determined by the Government of India in Council in accordance with the following rules —

- (1) — The number of Subordinates will be determined by the whole number of Upper Subordinates in each rank of a Branch.
 - (2) — The number of Supervisors will be fixed by the whole number of Subordinates in each rank of a Branch.
 - (3) — The number will be Overseers.
 - (4) — The proportion in the various grades of the rank will be determined by present rule.
- The revised rules may be brought into force from 1st October 1880.

ORDER: On the 14th October 1880 the Government of India in Council has decided that the following rules shall be brought into force from 1st October 1880. The rules shall be published in the Gazette of India.

1. The number of Subordinates in each rank of the various Branches of the Public Works Department shall be determined by the whole number of Upper Subordinates in each rank of a Branch.

2. The number of Supervisors in each rank of the various Branches shall be fixed by the whole number of Subordinates in each rank of a Branch.

3. The number of Overseers in each rank of the various Branches shall be determined by the whole number of Subordinates in each rank of a Branch.

4. The proportion in the various grades of the rank shall be determined by present rule.

The revised rules may be brought into force from 1st October 1880.

25 If no return is made by any person on whom a notice has been served as provided in the last preceding section the Collector may proceed by such ways and means as to him shall seem expedient to ascertain the annual value of the lands held by such person and in case it appears that such annual value is greater than the rent paid by such person the expense of such valuation shall be borne by such person and may be recovered with all costs of recovery thereof as provided in sections 98 and 99, but in all other cases shall be borne by the District Road Fund

26 If it shall appear to the Collector that any person on whom a notice has been served under section 24 has been wrongly classed in the return as a cultivating ryot, the Collector may direct that the entry be corrected and that such person be classed as a tenure holder, and thereupon such person shall be deemed to be a tenure holder for the purposes of the assess-

ment and levy of the cesses in respect of the lands held by him

27 Whenever the revenue annually payable in respect of any estate or the rent annually payable in respect of any tenure does not exceed the sum of one hundred rupees the Collector may without issuing any notice for such estate or tenure—

(a) in any case determine the annual value of the land comprised therein to be in a permanently settled estate or tenure a sum not exceeding three times and in a temporarily settled estate or tenure a sum not exceeding twice the amount of the annual revenue or rent payable therefor or

(b) when the area of the said estate or tenure has been ascertained, determine the annual value of such estate or tenure to be at such rate per acre as to him shall seem fit

28 When the area of any revenue free estate or cut free tenure the gross rental of which does not exceed or is not estimated by the Collector to exceed the sum of one hundred rupees has been ascertained the Collector may, without issuing any notice for such estate or tenure determine the annual value of such estate or tenure to be at such rate per acre as to him may seem fit

29 When the land contained in any estate or tenure has been summarily valued by the Collector in the manner provided by clause (a) of section 27 the annual value of any portion of such land which is comprised within a tenure subordinate to such estate or tenure shall be determined according to the following rules—

(1) —When the subordinate tenure comprises the whole of the estate or superior tenure the annual value of the subordinate tenure shall be taken to be the same as that of the estate or superior tenure

Example — An estate paying a revenue of Rs 80 is summarily valued by the Collector under clause (a) of section 27 at Rs 200. The whole estate is let in palm for a rent of Rs 10. The annual value of the palm tenure will be Rs 200.

(2) —When the subordinate tenure comprises a part only of the land constituting the estate or superior tenure—

(a) The difference between the annual value of the estate or superior tenure, and the revenue or rent payable in respect of such estate or superior tenure shall first be ascertained

(b) Next the ratio which such difference bears to such revenue or rent shall be ascertained

(c) Then the amount which bears the same ratio to the rent payable in respect of the subordinate tenure shall be ascertained

(d) Half of the amount so ascertained shall be added to the rent payable in respect of the subordinate tenure, and

the result shall be taken to be the annual value of the subordinate tenure

Example 1 — An estate paying a revenue of Rs 60 is summarily valued by the Collector under clause (a) of section 27 at Rs 100. Only one fourth of the estate is let in palm for a rent of Rs 17 8.

The difference between the annual value of the estate (Rs 100) and the revenue paid in respect of it (Rs 60) is Rs 40. This difference bears a ratio of two thirds to this revenue (Rs 60).

The amount which bears the same ratio (two thirds) to the rent payable in respect of the patni (Rs 37 8) is Rs 25

add half of Rs 25 to the rent payable in respect of the patni tenure and the result (Rs 37 8 + Rs 12 8 =) Rs 50 will be the annual value of the patni tenure.

Example B—Within the patni tenure paying a rent of Rs 37 8 as in example A is a darpatti tenure paying a rent of Rs 9.

The difference between the annual value of the patni tenure ascertained as above (Rs 50) and the rent payable in respect of the patni (Rs 37 8) is Rs 12 8 which bears a rate of one third to the said rent.

The amount which bears the same ratio (one third) to the rent payable in respect of the darpatti (Rs 9) is Rs 3.

add half of Rs 3 to the rent payable in respect of the darpatti and the result (Rs 9 + Rs 1 8 =) Rs 10 8 will be the annual value of the darpatti tenure.

30 When the land contained in any estate or tenure has been summarily valued according to a rate per acre under clause (b) of section 27 or under section 28 the annual value of the land comprised in any subordinate tenure shall be taken at the same rate per acre as that of the estate or superior tenure.

31 The holder of any estate or tenure which has been summarily valued under section 27 or 28 may within one month from the posting of the valuation roll in respect thereof under section 35 lodge a return in the form in Schedule (A) contained in regard to such estate or tenure and thereupon such return shall be deemed to be a return made as required by section 16 and shall be dealt with accordingly.

32 Instead of proceeding to value any estate or tenure summarily under the provisions of section 27 or 28 the Collector may if he think fit cause a notice to be served in respect of any such estate or tenure in the form No I in Schedule (B) contained or in the form No II in the said Schedule contained as the case may be and thereupon all the provisions of this Part shall apply in the same way as they would have applied if the annual Government revenue or rent payable in respect of such estate or tenure had exceeded one hundred rupees.

Lands used for Tea Coffee, or Cinchona

33 In the case of lands acquired under any rules issued by or under the authority of, the Government for the sale lease grant or clearance of waste lands or held directly from Government and used for the cultivation of tea coffee, or cinchona the Collector shall in lieu of the notice prescribed by section 16 cause a notice to be served calling on the holder of such lands to lodge within two months of the service of such notice a return in the form in Schedule (C) contained giving the particulars in such form set forth and the annual value of such lands shall be fixed at ten rupees in respect of every acre therein entered as cultivated unless the Board of Revenue shall in any particular case prescribe a lower rate. The provisions of sections 15 and 21 shall apply to all lands in respect of which a notice has been issued under this section.

Publication of Valuation Rolls and Duration of Valuations

34 Whenever any valuation or revaluation is made under this Part the Collector shall cause to be prepared from the returns furnished to him and from the valuations made by him in accordance with this Act a valuation roll of each estate within his district and of the tenures therein comprised noting thereon for each estate the amount of revenue annually payable to Government on which the deduction specified in section 41 is to be calculated.

On the application of any holder of an estate or tenure or holding and on payment of such copying fee as the Board of Revenue shall from time to time determine the Collector shall cause to be furnished to such holder a copy or corrected copy of so much of any such returns and of any such roll as relates to the lands included within his estate tenure or holding.

35 On the completion of every roll prescribed under this Part the Collector shall cause a copy thereof to be posted up at the mal cutcherry of the estate to which such roll refers and shall cause extracts of such portions of any such roll as refer to any tenure to be posted up at the mal cutcherry of such tenure.

Provided that if no such mal cutcherry be found such roll and such extracts shall be posted up at some conspicuous places on the estate and tenures respectively to which they refer and that if such estate or tenure cannot be found such roll and such extracts shall be posted at some conspicuous place in any village in which such estate or tenure is believed to be situated.

The person who is entrusted with the publication of any such return shall obtain in acknowledgment in writing signed by two persons who may be either respectable residents of the neighbourhood or chowkidars, or other officers of Government to the effect that such return was duly published on the spot and shall give in such acknowledgment to the Collector.

37 Nothing in section 36 contained shall be held to debar the Collector with the sanction of the Board of Revenue from making at any time any reduction which he may think fit in the valuation of any estate or tenure.

or from making a valuation of and assessing and levying cesses under the rules laid down in this Part upon any estate or tenure which for any reason whatever has been omitted from the valuations and assessments for the time being in force or which was not in existence when such valuation or assessment was made.

Provided also that if any person against whom such certificate has been made shall object that the amount of the cesses for the recovery of which the certificate has been made is greater than the amount which the applicant for the certificate would recover from such person in a civil court as being equitably payable in respect of such person's share or interest in the estate and if in the opinion of the Collector there is probable ground for such objection the Collector may, if he see fit cancel such certificate, and leave the applicant to his remedy in the civil court.

The mean pressure, temperature &c are deduced from the traces of the barograph and thermograph

The maximum and minimum temperatures are obtained from self registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor General's Office.

The hygrometric elements are obtained from Tables III, IV and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The direction and movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground.

1 Every application for a license to manufacture salt under the provisions of section 7 of Act VII (B C) of 1861, shall be presented to the Collector of the district where

the manufacture is intended to be carried on who shall forward it to the Board of Revenue through the Commissioner of the Division with an expression of his opinion as to whether the application should be granted or not. In the former case after ascertaining the boundaries within which the manufacture is to be carried on and the area of the land the Collector should consult with the District Superintendent of Police and report the strength and cost of the preventive guard which should be stationed in the latter full reasons for rejecting the application should be recorded. The payment of the sum fixed forms one of the conditions on which the license is granted and should be provided for in the agreement mentioned in the same rule a clause being inserted to the effect that on default of such payment within the specified time the license may be cancelled and all salt manufactured under the license at the place of manufacture attached and confiscated. The salt so confiscated should be sold by auction at the highest price bid above the duty and the sale proceeds should be applied after paying the duty to defray the charges on account of the guard and excise establishment and the costs incurred the balance being made over to the defaulter. If the proceeds should not suffice to pay the duty and charges the balance may be realized by the sale of any other salt belonging to the defaulter.

In Orissa and the district of Midnapore however the cost of these establishments will be defrayed by Government except in cases in which the output of the manufacture yields a revenue less than 20 times the cost of establishment when the cost shall be defrayed by the manufacturer.

The day's output should be brought to the depot at a fixed hour from one hour before sunset till sunset. The Pass Officer should receive the salt and measure it in standard buckets supplied by the Collector and make a note of which furnaces it comes from so as to secure the full complement from each furnace. If any furnace falls short of the ascertained quantity the mate of that furnace should be added to account. The standard bucket shall contain exactly one maund of 4 seers at 80 tollahs to the seer.

8 The Pass Officer shall send to the Collector daily a copy of his record showing how many baskets of salt have been received at the depot. This record shall be kept in cheques similar to those used by the Pass Officers for protection of salt on its way to the Jangals.

9 The manufacture of salt shall be closed on such date as the Board of Revenue may be pleased to prescribe in each case the date being specified in the license of each manufacturer. All salt manufactured after that date shall be held to be salt manufactured ~~under~~ ⁱⁿ a

The result of such inspection should be reported to the Board through the Commissioner. In Orissa inspection may be made once a year. 40 Boats, carriages, &c., covered by challans must stop at the last pass station on the route until the arrival of the boat, carriage &c. which is carrying the rowannah, and none of them must go beyond the pass station until the rowannah has been examined. 44 If the police in charge of the last pass station on any route have reason to suspect that a boat laden with salt is passing the station without stopping to give up the rowannah they shall follow the boat and on overtaking it if the parties are known the police should apply to the Magistrate for a summons to arrest them under section 148 of the Code of Criminal Procedure (Act X of 1872). If however the police have reason to believe that the accused are about to abscond they should request the Magistrate to issue a warrant instead of a summons in the first instance as provided in the same section. If the parties are unknown, the police should act under the provisions of section 93 of the Criminal Code of Procedure and detain them in order to ascertain their names and address. If the names and address given are believed to be correct summons should be applied for as indicated above. If the names and address given are believed to be false the parties should be forwarded to the Magistrate in the manner prescribed in section 93 above referred to.

45 The names of the police pass stations at which it will be necessary for proprietors of salt to have their salt and passes examined and endorsed shall be notified from time to time in the *Calcutta* and *Lehanga Gazettes*.

Omission or neglect to comply with this rule shall subject such trader to a fine of Rs 20 for each offence. The Sub divisional Officer will forward the returns to the Collector with his remarks.

A register showing the sales of salt by each wholesale and retail trader in each month should be kept by the Sub divisional Officer in the following form —

SECTION VIII —RULES RELATING TO THE RECEPTION AND CLEARANCE OF SALT SUBSIDIARY TO THOSE CONTAINED IN ACT VIII OF 1878

Rules for Weighment and Admission of salt into Warehouses public or private, under the Customs Law

1 On receipt of an application under section 91, Act VIII of 1878 for the admission of salt into a public or private warehouse and after the due execution of a bond under the provisions of section 92 Act VIII of 1878 the Collector of Customs shall make such arrangements as he may deem necessary for the proper weighment of salt during its discharge from the vessel, for the purpose of being conveyed to the appointed licensed warehouse

2 The weighment shall be conducted in the presence of the preventive officer on board, and the expense thereof shall be charged to the bondholder at a rate of Rs 3 per 1 000 maunds

3 No salt for which the full duty has not been previously paid shall be taken from any vessel save in a lighter provided with hatches which are capable of being securely fastened down, and it shall be the duty of the preventive officer on board to satisfy himself that such lighter is in serviceable condition before permitting such salt to be placed therein

4 As soon as the bonder or his agent or servant shall notify to the preventive officer that he desires to proceed with any boat load of salt he shall obtain a boat note, in which the name of the importing vessel and of the bonder the quantity of salt contained therein, and the warehouse wherein it is to be deposited shall be specified. The salt shall thereupon be carefully impressed with a stamp specially provided for this purpose and the hatches shall be closed and sealed by, or in the presence of the preventive officer. The lighter shall then be allowed to proceed in charge of a native officer or peon deputed for the purpose by the Custom house authorities, accompanied by an agent on the part of the bonder.

5 The boat shall be anchored, if possible at the steps of the ghât leading to the warehouse in which the salt is to be stored otherwise at the moorings nearest to such ghât. It shall on no account be permitted by the native Custom house officer or peon on board to anchor at the outward moorings.

6 Notice of the arrival of such salt shall at once be given by the Custom house officer to the Government Superintendent in the case of salt to be bonded in a public warehouse or if the salt is to be bonded in a private licensed warehouse to the Inspector or Superintendent of licensed Warehouses who shall thereupon note the date and hour of arrival bringing any unreasonable delay to the notice of the Collector of Customs, and depute a proper officer to examine and compare the boat note delivered by the preventive officer to the bonder his servant or agent, and the cargo of salt and to superintend its removal to, and storage in, the appointed warehouse.

7 The bonder's agent and native Custom house officer or peon shall remain on board of the boat in charge until the seals and hatches are examined and all the cargo landed and stored.

8 The Bonder will be held responsible for any departure from these rules on the part of his agent and the Superintendent or Inspector of the warehouse shall take notice of any dereliction of duty on the part of the native Custom house officer or peon.

9 All expenses connected with the removal and storage of the salt shall be borne by the bonder who shall also pay to the Collector such fees as he may fix for the services of the officer or peon in charge of the salt from the time of its discharge from the vessel's side to the completion of its storage in the warehouse.

10 If the officer appointed by the Superintendent or Inspector of the Government or private licensed warehouse shall have reason to believe that the salt has in any way been tampered with during its transit by river he shall at once report the circumstances to the Superintendent or Inspector who with the permission of the Collector shall direct the salt to be reweighed and such reweighment shall be made at the expense of Government.

11 If there be found any unexplained deficiency in the salt on board the cargo-boat as compared with the quantity specified in the boat note the whole of the salt contained in such boat shall be confiscated, and the bond under which the salt is in course of being stored shall be cancelled.

12 Salt relating to different bonds shall be stored separately and distinctly. Any admixture of salt specified in different bonds shall render those bonds liable to cancellation and the holders to immediate payment of the full duty payable thereon.

13 On salt bonded in a warehouse under the exclusive control of a Government warehouse keeper the duty shall be calculated on the quantity actually delivered from such warehouse.

14 On salt bonded in a private licensed warehouse the duty shall be calculated on the quantity delivered on weighment from the side of the ship in which it was imported less an allowance on account of waste, which shall not in ordinary cases exceed $2\frac{1}{2}$ per cent on the quantity bonded.

15 In any special case the Board of Revenue as chief customs authority of the presidency, is competent to direct that an increased allowance for waste shall be granted in accordance with the provision of section 122 Act VIII of 1878.

16 If the Collector of Customs has any reason to believe that any fraud has been perpetrated by the bonder or owner of the salt, or any person in his employ he shall refuse to make any allowance on account of waste, and shall demand the full duty payable on the entire quantity received into bond.

17 The Rs 3 per 1 000 maunds paid for the weighment of salt on shipboard under Rule 2 shall be credited to a fund to be instituted by the Collector of Customs. The Collector shall from time to time make such subsidiary arrangements as he may deem most conducive to the interests of both Government and the public for carrying on all such weighments, the costs of which will be defrayed from the fund in question.

18 In the case of public warehouses the Board of Revenue shall fix from time to time the amount of rent to be paid by the bondholder per 1000 maunds of salt. Ordinarily no golah should be made available unless the quantity of salt to be bonded is equal to two thirds of the storage which the golah is capable of containing but when accommodation in golahs of suitable dimensions is not available the rent to be demanded should be calculated on the quantity of salt which would amount to two thirds of the storage capacity of the building, whatever the actual quantity of salt bonded may really be.

SECTION IX.—RULES FOR THE CLEARANCE OF SALT FROM BONDED WAREHOUSES, PUBLIC OR PRIVATE

1 All deliveries of salt bonded in a public or private warehouse under the provisions of Act VIII of 1878 shall be supervised as required by section 99 of the above Act by a Customs officer and a native officer styled a Ghât Mohurrir. These officers will be deputed on application to the officer in charge of the Custom house.

2 The expenses incident to their employment shall be borne by the bondholder, at the rate of Rs 5 for a Customs officer and 8 annas for a native officer per diem. These officers will be paid daily. If required so to do the bondholder or applicant for their services shall pay into the hands of the officer in charge of the Custom house a sum sufficient to meet the expense of employing such officers.

3 The present working hours at the Sullia Government golahs will continue to be observed with regard to all deliveries whether from public or private warehouses viz from 6 A.M. to 2 P.M.

4 Scales and weights will be provided by Government, but bondholders are required to make their own arrangements for cutting and removing their salt from the warehouses as well as to supply their own tools for cutting the salt such as *sabools kodulies* &c.

5 There will be one Customs officer at each scale and his duty will be to keep in a book provided for the purpose at the expense of Government a correct tally of the bags as they are weighed and taken off the scale by the bondholders' people as well as to see that each bag contains neither more nor less than the prescribed quantity of salt viz *two maunds*. He will be held personally liable for any excess or deficiency that may be discovered at the *check scales* presided over by the golah officers.

6 The Superintendent will be held responsible for making such arrangements as will ensure the efficient working of the check scales. At least 10 per cent of the bags used from the golahs should pass through these scales.

7 Should any dispute arise between the Customs officer and the bondholder or purchaser of the salt under delivery the former will stop the weighing and at once refer the matter in dispute to the Superintendent for orders.

8 The Customs officer will be particularly careful to bring every irregularity that he may become cognizant of to the notice of the Superintendent without delay and will be held responsible for failure in doing so.

9 There will be one Ghât Mohurrir for each scale. He will be posted at the proper discretion of the Superintendent either at the ghât, when salt is being passed into boats or on the roadway when it is being removed in carts. In either case he will not be allowed to hold any communication whatever with the Customs officer posted within a golah except through the Superintendent until after the day's work is over when his tally will be compared with that kept by the Customs officer and, if found to agree, signed by the Superintendent.

10 The Ghât Mohurrir's duty will be to keep a similar tally to that of the Customs officer but in *Bengali*. He will also keep a tally by means of counters supplied by the department. One such counter will be made over to him by each cooly as he passes him with a bag and will represent *one bag* or *two maunds of salt*. After the rowannah quantity has been delivered these counters will be compared with his written tally as well as with that of the Customs officer for the purpose stated in rule 8.

11 When discrepancies in the accounts cannot be reconciled and whenever the Superintendent has reason to believe that the quantity of salt conveyed to the boat or cart is not correctly represented in the accounts he shall hold a re-weighment. The expense of such re-weighment shall be borne by Government.

12 Whenever the bondholder or purchaser is desirous of removing his boats or carts from the premises the Superintendent will satisfy himself on every point before granting the usual protective document. He will before granting a pass at all times satisfy himself even where the accounts agree that the boat load or cart load represents the exact quantity entered in the rowannah.

13 Koyals and Tippanaveesees will not be employed as heretofore in checking weighments

14 The following extra charges to be levied from bonders, in addition to the rates for ordinary working days will be demanded for both reception into and delivery from, bond on Sundays and holidays, viz —

SECTION X — RULES RELATING TO THE DELIVERY OF SALT FROM BOARD SHIP

1 The present working hours are from 8 A.M. to 5 P.M. Leave to work extra hours is only granted when the Collector sees sufficient grounds to permit it

2 Partial deliveries are prohibited in so far as each boat load is concerned. When the loading of a boat is commenced it must be finished before the loading of another boat is commenced. If a boat's loading is commenced during extra hours it must be completed without any interruption whether the loading is completed in regular or extra hours.

3 If by any unforeseen circumstance it should become necessary to interrupt delivery the boat partially loaded shall receive a boat note in the following form and shall remain alongside the discharging vessel subject to seizure in the event of her trying to leave the ship's side.

Preventive Officer

4 Delivery on a rowannah of more than 300 mounds should not be commenced after 4.30 P.M. so as to ensure its completion within working hours.

5 The quantity of salt covered by the rowannah first taken up must be discharged whatever the number of boat loads may be before delivery is commenced on a second Rowannah. In exceptional cases where this is impossible and adherence to the rule is calculated to cause delay and inconvenience to the ship the preventive officers before commencing delivery on a second rowannah (the first being incomplete) shall make an immediate report to the Collector detailing the circumstances which have rendered a departure from the rule necessary. Such report shall be countersigned by the Commander or Chief Officer of the vessel and its number (if any) and date shall be entered by the preventive officers in the tally book.

6 The pages of all tally books shall be numbered and signed at the head by the Superintendent of the Preventive Service and as soon as each page is filled the preventive officers shall, before commencing a fresh page, require the Commander of the vessel or Chief Officer to sign at the foot of the page which has been written up.

7 On the completion of deliveries of salt from board ship upon rowannahs the holders thereof must present them to the Board's office for the purpose of having the endorsements made on them by the preventive officers examined. Challans will then be granted with regard to such rowannahs as would require them according to section 39 of the Government rules. This rule will not prevent all merchants removing their salt laden boats from the ship's side to safe and convenient places in the river under the boat notes previously granted by the preventive officer. Preventive officer will invariably when they deliver a completed rowannah to a merchant or to his gomastah warn him to present his rowannah at the Board's office.

8 No salt may be landed from ship board or removed from the bonded golahs into the excepted limits of Calcutta and Howrah unless protected by a certificate (Form F, appendix) granted by the Collector of Customs (section 1 Rule 36A). Within 24 hours after the delivery of salt from board ship under a certificate the holder thereof must present it at the office of the Collector of Customs for the purpose of having the endorsement made on it by the preventive officer examined after which it will be returned to the holder in order that the salt covered by it may be landed.

The mean pressure, temperature &c. are deduced from observations made at 6 h, 10 h, 16 h and 22 h and from the traces of the barograph and thermograph.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No. 86 formerly at the Surveyor General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's communications of August's formula.

The direction and movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain gauge is one foot above the ground.

Read again—

Resolution No 2037 dated 20th December 1879 publishing the Rules for District and Presidency Savings Banks

Resolution No 909 dated 20th February 1880 republishing, the Rules of the 20th December 1879 as finally revised

RESOLUTION —In promulgating the Savings Bank rules first published on the 20th December 1879, and revised and completed on the 20th February 1880, it was the intention of the Governor General in Council to facilitate and encourage the deposit of savings in the Public Savings Banks. It was not the object of His Excellency in Council to compete with ordinary banks of deposit or to attract to the public treasury deposits which would, in ordinary course, be left with such banks

2 The balances in deposit in the Government Savings Banks of all kinds have been as follows —

		Rs
On the 31st March	1870	1 01 63,000
	1871	1 08 55 000
	1872	1 23,68 000
	1873	1,47,82 000
	1874	1 73 69,000
	1875	1 74 68 000
	1876	1 89 51 000
	1877	1 93 62 000
	1878	1,92,54,000
	1879	1,91,25,000
On the 31st December	1879	2,04,26,000

3 The new Rules came into operation on the 1st January 1880, and the subsequent additions to the deposits in the Savings Banks have been as follows —

	Rs
January	6,15 000
February	7 26 000
March	8 65,000
April	9 87 000
May	9 58,000
June	10,18 000
July	17 02 000
August	19 63,000
Total	93 34 000

4 Thus the balances in deposit on the 31st August last had increased to Rs 2,97,60,000 The deposits since the 31st August are not yet known

5 It is evident that the effects of the new rules have been to stimulate deposits more than was anticipated Moreover, it has been ascertained that many of the new depositors do not belong to a class for whom Public Savings Banks are designed

6 The Governor General in Council has accordingly resolved to restrict again the amount of deposits to be received on one account to Rs 500 in one year and to limit to Rs 10½ the amount of monthly interest to be allowed on one account

7 This last limitation, however, will not till the 1st of May next apply to depositors who are already in receipt of higher monthly interest Without the special authority of the Comptroller General, no depositor who is not already receiving more than Rs 10½ monthly interest will in future receive more monthly interest than that sum and, subject only to the special permission to the contrary of the Comptroller General this limit will from the 1st May 1881 apply to all deposits, excepting only compulsory deposits in State Railway Savings Banks

The following revised rules for Government Savings Banks are accordingly published all previous Rules being revoked —

I—In these Rules—

“Depositor,” “Deposit” and “Secretary” bear the meaning which they bear in *The Government Savings Bank Act 1873*

“Account” means the account of a depositor in a Government Savings Bank

“Balance” means the balance at credit of an account

II—Any person may become a depositor on his own behalf, or on behalf of any other named person dependent upon him Deposits may also be made by the managers of benevolent or other public associations, or by public officers, of money deposited with them *ex officio* as security for the discharge of any public duty or for the fidelity of any public officer or for the accomplishment of any public object

III—Subject to the provisions of these rules the Government of India guarantees the repayment of every deposit with interest

IV—Without the sanction of the Comptroller General, no account will be open for less than one rupee, and no person may deposit more than five hundred rupees in all between the 1st of April in any year and the 31st March of the following year

V—Interest will not be allowed upon a smaller balance than 1½ rupee, or upon the excess in any balance over the highest multiple of 1½ rupee

VI—Interest will be allowed for each calendar month upon the minimum balance of the account between the close of the fourth day and the end of the month

VII—Till further notice, interest will be allowed upon deposits at the rate of one pie a month for every 1½ rupee which is equal to one anna for every Rs 18, or one rupee for every Rs 288 being at the rate of Rs 4½ per centum per annum Without the sanction of the Comptroller General, no higher monthly interest will be allowed upon any balance than Rs 10½

VIII—On the written request of any depositor, his balance, or any part of it will be invested by the Comptroller General in his own name in trust for and at the risk of the depositor at current market rates in stock of any loan which he may specify if no particular loan is specified, than stock of one of the four per cent loans will be bought and stock or notes of any Government loan to a moderate amount, may be received by the Comptroller General from or on behalf of any depositor and converted into stock The stock thus bought or received will be held by the Comptroller General on the depositor's account the interest thereon less a commission of one quarter per cent, being added to his deposit on advice from the Comptroller General and entered in his deposit book the first time that it is subsequently presented Stock held on account of a depositor will, on his written request be sold, and the proceeds added to his deposit or if he desires it will be converted into notes and delivered to him A commission of ½ per cent besides the Bank's fees will, be charged upon such purchases sales, and deliveries

IX—Every account will be made up on the 31st March, and the interest then due calculated under these rules, added to the balance upon which future interest will accrue If an account is closed on any other date, interest due to the end of the preceding calendar month will be paid to the depositor but a depositor who closes an account should not ordinarily be permitted immediately to reopen it, except on payment of a fine varying at the discretion of the Secretary from one to ten rupees

X —Whenever a depositor changes his residence, an account may be transferred, free of charge, to the Government Savings Bank in the district to which the depositor is removing. Without the special permission of the Comptroller an account may not be otherwise transferred from one Bank to another.

XI —A deposit book will be supplied to each depositor in which the Secretary or, if the Savings Bank is at a public treasury, the treasury officer, will acknowledge every deposit. The personal attendance of a depositor is not required but no deposit will be received, or payment made, without the depositor's deposit book, and the Government will not be responsible for any deposit the receipt of which is not acknowledged in a deposit book. The interest due to date will be entered in each deposit book the first time that it is produced after the 31st March. The first deposit book will be supplied free of charge but, if a deposit book is lost or injured, or if a closed account is reopened one rupee will be charged for a new book.

XII —Without special permission, a Depositor may not operate upon his account more than once in thirty days or open more than one account in his own name or in the name of any member of his family or for his own benefit, or the benefit of any member of his family. The Comptroller General must take precautions to prevent any transgression of this rule and in particular, any employment of an account as an ordinary drawing account. This rule is not meant to prevent any one from opening more than one *ex officio* or public account.

XIII —The Secretary may refuse to open any account or may close any account for any sufficient reason as for example because he thinks that the account is likely to be used, or is being used contrary to the object with which Government Savings Banks are established namely the encouragement of saving.

XIV —When the Secretary thinks it proper to close any account he shall give notice in writing to the depositor of such closure. After the date of such notice no deposit shall be accepted on the account so closed and no interest shall be allowed upon the balance of the closed account after the end of the calendar month then current.

XV —These rules apply as well to accounts opened before as after their publication.

XVI —The Governor General in Council reserves the right to alter or add to these rules at any time.

XVII —A copy of the Government Savings Banks Act 1873 and of these rules, shall be printed in each deposit book and the signature or, if he cannot write, mark of the depositor, obtained to the annexed declaration before any deposit is accepted from him.

Declaration to be recorded in accordance with Rule XVII

I acknowledge that I have read these rules (or, if he cannot read, that these rules have been read to me)

RESOLUTION ON THE ANNUAL ADMINISTRATION REPORT OF THE
FOREST DEPARTMENT IN BENGAL FOR 1879 80

REVENUE DE TABAC—FOISSIS

Darjeeling the 28th August 1880

READ—

The Progress Report of Forest Administration for 1879-80

The report is submitted by Mr. J. S. Gamble, who has officiated as Conservator throughout the year.

2 The expectation expressed in last year's report that 1,816 square miles would probably be added to the reserved forest area during 1879-80 has not been fulfilled, it having been found impossible to complete the arrangement for notifying the further reserves to be taken up in Singbhoom, Chittagong, and other divisions. The report on the Samant forests in Singbhoom has, however, been submitted by Mr H Davis, the Assistant Conservator, who was specially deputed to examine them, and as soon as the Conservator has made his inspection, demarcation will be commenced. These forests are chiefly sal and though much injured by fires and indiscriminate tapping for resin, they appear likely, under good management, to form a valuable addition to the timber tracts of Bengal. The Conservator has, he reports inspected most of the forests in the Julporee and Buxa division which remain to be taken up, and the proceedings necessary before final notifications can issue are in progress in respect of the other tracts referred to above. The exact state of affairs in each division will be noticed below. The Khotas, Pchul, and Bansikoh forests in Shahabad have been finally excluded from the reserved area. The

following table shows the present reserved area and the expected accessions to it as now given —

District	AREA IN SQUARE MILES					
	At the beginning of 1880	Added during the year	Relinquished during the year	Total	Expected increase	Total
District	37	1	44	3	5	384
Chittagong	138	19		1	13	256

Subordinate	1				1	400
Subordinate	1				1	1581
Subordinate	1				1	170
Total	97	19	81	4	118	4743

3 It was shown in last year's report that most of the area finally reserved had been demarcated, and further progress made in the demarcation of tracts as to which preliminary notifications had issued. The only work in fact now remaining to be done is in tracts regarding the boundaries of which some question has still to be decided, or the limits of which are liable to modification by the proceedings of forest settlement officers. The boundary records are apparently making satisfactory progress.

4 The monthly maximum allowance for subordinate forest and office establishment was fixed at Rs 5,000 for 1879-80, but has for 1880-81 been raised to Rs 5,581 to provide for the increased area taken up in Chittagong. The superior staff consisted, on the 1st April 1880, of 13 officers. Since that date the orders of the Government of India have been received, fixing the strength of the superior forest staff for Bengal and Assam to be thus—

Conservators	2
Deputy Conservators	5
Assistant ditto	8
Sub Assistant ditto	4
Total	19

Of these, six are now employed in Assam. The staff allowed for Bengal, with its increasing forest area, will the Lieutenant Governor fears, even when all the officers are present, prove very inadequate, and the grant of leave will, unless special assistance is given from the staff of other provinces, be almost impossible.

5 There has been a further decrease in the number of prosecutions for breach of forest rules, there being only 67 cases involving 158 persons against 74 cases with 247 defendants in 1878-79. In 56 cases convictions were obtained as against 38 only in the previous year—a greatly improved result. In nine of the cases the charge was that of injuring the forests by fire, in 31, of unauthorized felling or appropriation of forest produce, and in nine, of grazing without permission in prohibited tracts.

6 An area of 139½ acres was added to the plantations during the year, bringing the total area up to 953½ acres. The Conservator remarks that the system of planting in lines has now been definitely adopted as the best and most economical. The following extract from Mr Gambles's remarks under this head may be of interest to the owners of landed property in the hills—

Planting in the Darjeeling Hills is by no means difficult below an altitude of 7,000 feet, where the difficulty exists is in the time required for raising plants in the nurseries until they are large enough to be put out without fear of their being choked by the ground vegetation which is usually so profuse. Besides seed is not procurable every year, the oaks scarcely give one crop every three years and some of the best species, like *Quercus pachyphylla* are most difficult to procure sound. The magnolia seed usually takes a long time to germinate. Perhaps the easiest hard wooded tree to grow in the hills is the pipil (*Buddleia populifolia*) which of late years has been very successfully grown. Maple and toon are always easy, while of exotic trees the ash (*Fraxinus floribunda*) and cypress (*Curatulus torulosa*) seeds of which have been procured regularly from the North West Provinces, have proved themselves to be perfectly hardy and to be as easy to raise as most trees indigenous to Sikkim.

7 An account is given as usual of the experiments which are being made at the Botanical Gardens, Howrah, and under the supervision of the

Forest Department, in growing various trees and plants of economic value. The experience of the year confirms the conclusions arrived at by Dr King as to the hopelessness of attempting to grow the Carob (*Ceratonia siliqua*), and the Para rubber (*Hevea Braziliensis*) in the climate of Lower Bengal. The Baobab plantation in the Botanic Gardens continues to grow slowly. But all the eight species of Eucalyptus are now reported to have failed, and Dr King considers it more waste of time to try to grow any of these trees in the Gangetic delta. On the other hand, the Ceara rubber tree (*Manihot Glazouii*) when freely exposed to sun and rain, has turned out to be a hardy plant easily grown and readily propagated. If its rubber proves good, Dr King anticipates that tea planters, with gardens on the plains and indigo planters will soon take it up and find it profitable. He is preparing to meet a large demand for young plants and seeds. The *Prosopis pubescens* a plant whose pods yield a tanning material is growing well, but has not yet flowered. The tree which yields the Divi Divi tan *Casalpinia coriaria* is found to yield pods freely in the garden, and seeds are now given gratis to all applicants. The Guango or rain tree (*Pithecolobium saman*) is said to grow faster than any hitherto introduced in Bengal. It gives a fine shade and yields a pod much relished by cattle. Dr King gets supplies of seed for distribution from Jamaica. The Forest Department is going to plant it in the Terai and elsewhere, and it is evidently a tree deserving the attention of landlords and planters. The wattle trees (*Acacia Melanoxylon*, *Decurrens*, and *Dealbata*) tried by the department in the Darjeeling division have grown well below 7,000 feet but bear transplanting badly.

8 The year was a favourable one generally in the matter of jungle fires. Of 447,806 acres attempted to be protected, success was secured over 423,105 at a total cost of Rs 18,254 (up to 30th June 1880). The only serious fires were in Palamou, and even there a large area was saved by the protective measures lately introduced, while the persons who caused the fires were punished. The great fires of 1879 in Sikkim and Darjeeling are said to have resulted in immense destruction of cane and bamboos, rendering those articles extremely scarce in the hill besides damaging seriously the forests of rhododendron and oak. The closing of the Khasi forests to hunting, shooting and fishing during the dangerous season (February to June) has reduced the risks from fire, and the measure will be extended next year to Julpigorie.

9 The number of trees felled during the year was 3,295 as against 6,481 in the previous year, but 100,017 cubic feet of timber were brought to depot against 75,082. Besides this, in Darjeeling and Julpigorie, 1,21,011 maunds of firewood and charcoal were supplied. The average cost to the department of the timber brought to depot during the last six years has been Rs 86 per 100 cubic feet and the average rate of sales Rs 14 per 100 cubic feet. The gross sales from depôts during 1879-80 amounted to Rs 1,36,464 against Rs 1,65,649 in the previous year. The slackness in the demand for timber for public works accounts for the difference.

10 The following table exhibits the financial working of the department for the past nine years —

Year	Income	Expenses	Surplus	Accumulated
	Rs	Rs	Rs	Rs
1871-7	8	677.6	11.4	100
1872-3	11.6	6.4	24.1	116
1873-4	1.3	10.5	3.2	119
1874-7	1.11	6	7	127
1875-7	1.3	15.08	198	2.86
1876-7	101	11.40	10.71	8.90
1877-78	13.303	11.11	1.71.1	3,434
1878-9	116.27	8	77.12	2,907
1879-80	140.54	7.18	173.776	2,946
Total	23.18	1.866	211.083	
Average for nine years	23.10	1.0677	77.43	

The surplus of 1878 79 was reduced by the exceptional payment of Rs 63,492 for lands in Kuiscong during that year. The favourable results of the past year were mainly due to the successful working of the forests in the Sunderbuns, and to a good season in the Chittagong Hills, the former contributing a surplus of Rs 1,49,604, and the latter of Rs 50,831. The Chittagong open forests from which this surplus accrued, were, however, it should be noted, in charge of the Deputy Commissioner of the district, and not of the Forest Department. Taking deficit and surplus divisions together, the reserved forests gave a net surplus of Rs 1,20,170, protected forests of Rs 2,775, and unreserved forests (Chittagong) of Rs 50,831. The value of the stock in hand at the close of the year was Rs 61,931 more than that in store at the close of 1878 79.

11 The following are the chief points which call for notice in the detailed reports of the different forest divisions.

12 *Darjeeling*—The present area of the division is 21,351 acres, divided into three ranges and fourteen protective belts which in this instance are co-extensive with the working blocks. The Rangbul Range (five blocks) comprises 5,687 acres, and is not likely to be increased. Its boundaries are all but completely demarcated. The Tukdah Range (five blocks) was shown last year at 10,467 acres but 2,951 acres were found to belong properly to the Jecsta forests and were excluded, bringing the Tukdah area to 7,516 acres. About 2,700 acres will, however, be transferred to this range from the Cinchona reserve, raising its eventual area to 10,266 acres. The Goompahar Range (four blocks) has been increased to 8,148 acres by adjustments of boundary and will receive a further addition of 135 acres when the Purnagong reserve is notified. The Lieutenant Governor has also directed that an area of about 1,000 acres held at present by the Municipality of Darjeeling should be made over to the Forest Department for management with the Goompahar Range. The opening of a cut road through this range has been effected at the cost of provincial funds, and if a branch line can be made connecting it with the steam tramway now approaching Darjeeling, the value of this forest should be greatly enhanced. Reproductive measures have been steadily pushed on, and though many difficulties have been felt, much useful experience has been gained, and good results obtained in both Rangbul and Tukdah. As regards the fuel operations in the neighbourhood of the station, it is satisfactory to learn that, owing to greater economy in the utilization of branches, stumps, and roots, the number of trees felled has been less in proportion than in former years. The suggestions made by Dr Bindis, Inspector General of Forests, on his visiting Darjeeling last year have led to improved and more systematic working in this as well as in other divisions. The receipts of the division gave a surplus revenue of annas 14 1 per acre, or Rs 560 per square mile—a considerable advance upon the returns of the previous year. The gross receipts were Rs 68,562 against Rs 66,472 in 1878 79. The charges were Rs 49,783 against Rs 52,860.

13 *Malda*—The area of this division is 12,015 acres, divided into five ranges and 19 belts or protective charges. The arrangements for finally notifying the eight blocks described in the notification of the 28th July 1878 are still incomplete, but it is hoped that before the close of 1880 81 the greater part may be finally received. Most of the new blocks have been demarcated, and their southern boundary will probably be adopted along its length as the district boundary of Darjeeling and Jalpaiguri. This is a difficult tract to protect from fire, and the year under review was no real test of the effectiveness of the arrangements made, but all possible precautions are being taken by fixing camping grounds for travellers, clearing broad boundary lines, closing jungle paths, and employing watchers to guard against destructive conflagrations. No fellings took place during the year but Rs 5,015 (against Rs 5,086 in 1878 79) were realised from sale of timber in dépôt and minor produce against an expenditure of Rs 16,958. An attempt made after six years' rest to resume the tapping of the rubber trees in this division seems to have been a failure, owing to the fact that the trees had not even yet recovered the heavy tapping of former years.

14 *Kuiscong*—The actual area of this division (62,895 acres) has not increased during the year, but the proceedings for adding to the reserves the

areas purchased in the Terai from Mr Lloyd and others, and the Babookhola and Mamring Hill forests are nearly completed and will extend the area by 8,184 acres. The division has four ranges and 19 protective beats. Complete demarcation has been delayed by the operations of the survey now going on, and negotiations rendered necessary by the encroachments of tea gardens. Much useful work has been done in opening up paths through the formerly trackless forests between the Mahanadi and Teesta rivers. Reproduction of toon, sâl, sissu, saj, and lampatia has progressed at Bamun pokri. The India rubber plantation has also been extended, and experiments in the growth of bamboo under irrigation have been undertaken at Sukna. Protective measures against fire have been extended to nearly the whole division, and the Conservator acknowledges the assistance given to the department by tea planters in arranging for mutual fire protection belts. On the other hand, the only serious occurrence of the year was caused by the manager of a Terai garden deliberately setting fire to the forest reserve. This case was prosecuted to conviction. There was an increase in the work done by the department as regards taking out of timber, although most of the requirements of the Tramway Company were met from private sources. The receipts for the year were Rs 40,047 against Rs 35,244 in 1878-79. The charges were Rs 30,354, of which Rs 15,289 were spent on the formation, improvement, and protection of forests.

15 *Julpigoree*—The area of this division was 106,530 acres at the close of the year. Proposals for adding the Malhati, Kyranti, and Goshai Hât forests—about 3,000 acres—are under consideration. The division has four ranges and 14 protective beats. The work of demarcation is complete. A good beginning has been made in the way of roads, which are much needed everywhere. Fire protection was attempted in all the blocks, and though some damage was done by fire in two of them, the arrangements were fairly successful. The receipts of the year were Rs 10,417 against Rs 8,286 in 1878-79. The charges were Rs 11,593. Next year a surplus is expected.

16 *Buxa*—No change took place in the area of this division during the year (160,000 acres). The Salkuer and Butri forests have been recommended for reservation, which will add 2,500 acres. The division has three ranges and 11 protective beats. The northern boundary, marching with Bhutan, is being laid down by a special officer. A large nursery has been stocked with seedlings of various trees, which will be planted out in bands and serve to protect the forests from fire. Besides this, about 9 acres were planted up with sâl seedlings. Special measures of fire protection suggested by the Inspector General were carried out and will, it is hoped, prove useful even in less favourable years than the last. The absence of fire is said to cause the sun grass to die out, which is of itself an important gain for the young sâl seedlings. The sales of timber were much below expectations, owing to a falling off in the demand for sleepers. But the receipts were still Rs 64,351 (against Rs 95,714 in 1878-79). The charges were Rs 56,088, of which Rs 14,678 were spent on fire protection.

17 *Palamow*—The area of reserves in Lohardugga amounts to 114,560 acres. The Shahabad forests, formerly grouped under this division, were, as already noticed, excluded during the year, the title of Government to the lands having been shown to be doubtful. There are in Palamow four ranges and 20 protective beats. The villages have now been all removed from the reserves and the boundaries are demarcated. A beginning was made in the way of fire protection, and lines 40 feet broad cut round the forests. Since the 31st March, however, three fires have occurred, burning 20,480 acres. The offenders have been prosecuted and punished. The receipts of the year were Rs 1,097 against Rs 757 in the previous year. The expenditure was Rs 11,978.

18 *Hazaribagh*—The Koderma forest in this district has only been notified since the close of the year. The officer in charge has been engaged in demarcating and reporting on the Saranda forests in Singhbhum, referred to in the opening paragraph of this Resolution.

19 *Sunderbans*—The area of the reserves was unaltered during the year, amounting to 1,011,840 acres, of which 244,480 are in the 24 Pergunnahs and the rest in Jessore. The area is divided into three ranges, and has

eleven toll stations No reproductive or fire protective measures were required here The experimental plantations of *Baobab* at Khulna and Ghooskhali are said to have failed The receipts of the division were Rs 1,87,324 against Rs 1,72,546 in 1878 79 The charges were Rs 37,720 against Rs 53,075 The net revenue was Rs 94 10 per square mile as against Rs 75 8 in the previous year

20 *Chittagong* —The area reserved in this division remains the same as last year—364,800 acres The proposed extensions notified on the 10th May 1878 have not been taken up pending the conclusion of proceedings before the Forest Settlement Officer Reproduction has been extended at Sitapahar Mahogany plants received from Dr King have been put out and are doing well Experiments with the Ceara rubber and *Platycolum* saman are being made Fire protection is only found necessary round the planted area at Sitapahar The receipts of the year were only Rs 2,204, and the expenditure Rs 19,411, but there is no doubt that eventually these reserves, which are full of fine timber, will bring in a large revenue

21 *Unreserved Forests* —These consist of a small tract in Julpigoree, which will eventually be brought into the reserves, and of 5,100 square miles of open forest in Chittagong, which were during the year under the management of the Deputy Commissioner, but are, from the 1st April 1880, to be taken charge of by the Assistant Conservator, subject to the control of the Deputy Commissioner The revenue from these Chittagong forests last year was Rs 58,246, and the expenditure Rs 7,415

22 *Protected Forests* —The only forests of this class are in the Sunderbuns, where they cover an area of 1,199,940 acres in the 24 Pargunnahs and 32,000 acres in Jessore The receipts of the year were Rs 12,124 and the charges Rs 6,744 The receipts represent only eight months' collections, as operations were only commenced after the year began The revenue from this tract ought to improve rapidly

23 The Lieutenant Governor is glad to learn that the health of the superior establishments has been better than last year, but there can be no doubt that most of the forest work in Bengal entails constant exposure to malarious influences, which must render a fair amount of leave absolutely necessary for all This makes the Lieutenant Governor regret the more the insufficient allotment of superior staff recently made by the Government of India to this province, and the weakening of the department by the transfer elsewhere of officers of local experience

24 The Lieutenant Governor has had every reason to feel satisfied with the management of the department by Mr J S Gamble, the Officiating Conservator, during the year under review

3 Referring to paragraph 11 of the report, I am to say that the Lieutenant Governor regrets that he is unable to sanction the special grant asked for therein for surrounding the Gardens with an iron railing

4 In conclusion, I am to convey the thanks of Government to the President and Members of the Committee, and especially to yourself, for the efficient management of the Gardens during the past year

G MITTIFR, Esq, Merchant

The Sanitary Commissioner of Bengal the Divisional Commissioners of Bengal and the Executive Engineer of the Hindu Calcutta Division are *ex officio* Members of the Committee

2 The following changes have occurred in the constitution of the management during the year under review —Mr Louis Schwendler accepted the appointment of Honorary Secretary and Treasurer when the late Honorary Secretary and Treasurer (Dr John Anderson) went on leave on 1st December 1879 The Committee regret to have to mention the decease of one of their colleagues—the Nawab Ameer Ali, Khan Bahadoor Mr Sterndale, Vice Chairman of the Suburban Municipality, resigned office during the year

3 The Committee have observed with regret that they have not as yet received the powerful assistance which they had hoped for from the appointment of the Divisional Commissioners in Lower Bengal to be *ex officio* members of their Committee, as noticed in paragraph 1 of their report for 1878 79 Without the cordial co operation of the Divisional and District Officers the Committee cannot expect to be able, effectually and economically, to develop and display the zoological wealth of the country The Committee have recently addressed another circular to these officers, and they hope that it will tend to promote more practical co operation It would, however, be of great advantage if the Government would call the attention of all Divisional and District Officers to the requirements of the Committee in order to give their full support to what may now be considered a national institution in Bengal The Committee acknowledge with satisfaction the issue of the Government order, No 15 of 24th March 1880, by which District Officers were authorized to pay for live animals forwarded to the Committee, the rewards which were previously sanctioned for killing such animals

4 No new large houses were built in the Gardens during the year, but the existing houses for animals and birds were in many respects improved and repaired, and a large expenditure was incurred in the substitution of strong iron railings for the wooden (*gurren*) fencing by which most of the paddocks were originally surrounded and divided. Although there is very little to show for this expenditure, it is a very important and durable improvement. With the permission of Government a second story was added to the dwelling house known as "The Hermitage," which was presented to the Zoological Gardens by His Highness the late Maharajah of Vizianagram. The Committee were authorized by Government to sell a part of their Government Promissory Notes to meet this expenditure, but they were fortunately able to meet the expense out of current revenue, owing to the unexpected accession to their funds from the gift from the estate of the late Maharajah of Burdwan.

5 The Committee are glad to report that they have received continued support from the public during the year, and that there has been a considerable increase in the number of new Life Members. The following list shows the principal donations and subscriptions received during the year —

6 One of the principal events of the year was the holding of a Cat and Dog Show on the 5th and 6th January 1880. This exhibition was opened in furtherance of one of the avowed purposes for which the Gardens were established, viz to facilitate the acclimatization, domestication, and breeding of animals, and to improve the indigenous breed of cattle and farm stock (*vide* original prospectus issued in 1875 under the sanction of Government). Although it may be admitted that a Cat and Dog Show is but a small beginning towards the attainment of the objects above set forth, nevertheless it is a beginning, and the Committee trust that in the course of time it may lead to a general exhibition of domesticated animals of all kinds. The recent grant by Government of the lands known as 'Bigunbari,' on the east side of the Zoerut road, will enable the Committee, in course of time, to enter upon arrangements for the breeding and exhibition of cattle on a large scale and approved system, but for the present the Committee have been unable to make any scientific use of the lands as it is necessary that they should become sweetened and purified from the mass of decaying rubbish with which the old tanks on the site were filled up by the Public Works Department, before it will be safe to utilize them, or to build upon them.

7 With regard to the Cat and Dog Show there was every reason to believe that it was much appreciated by the public, although the Committee were compelled to hold the exhibition upon dates which came so closely upon the public holidays, that many persons were prevented from attending. Owing to the inexperience of the Committee in such undertakings, their expenses were larger than was anticipated, and the departmental charges for the use of Government tents, the cost of advertisements in the newspapers, and the expense of the Military bands only left the Committee with funds derived from the receipts for admission barely sufficient to provide 45 prizes for dogs and 11 for cats. One hundred and fifty two dogs and twenty one cats were exhibited, and some of the specimens were considered, by very competent judges, to be very good. The Committee desire to acknowledge the very valuable assistance which they received from Dr. Greenhill in adjudicating the prizes—a matter of very serious difficulty, considering the extraordinary confidence which each exhibitor entertained of the superiority of his own pet animal.

8 The Committee have endeavoured to provide for the entertainment of the public, and to increase their own finances by holding several Moonlight Fêtes, when the Gardens were kept open until midnight, and Military music was engaged for the gratification of the spectators. These fêtes were held on 31st October 1879, 27th February 1880, and 27th March 1880, and were very largely attended, contributing a net sum of Rs. 1,284 3 to the funds of the Gardens after defraying all expenses.

9 An important change was introduced during the year (from 1st December 1879) as regards the entrance fees for admission to the Gardens. The charge was fixed at one anna only on every day of the week up to 3 P.M. during the cold season, and up to 5 P.M. during the remainder of the year. The charge after 3 P.M. during the cold season, and after 5 P.M. during the remainder of the year was fixed at—

4 Annas on week days

1 Rupee on Sundays

Children under eight years of age have been admitted free of charge.

10 The object of this scale of charges is to enable the natives of all those classes to whom a brief exposure to the sun is a matter of comparative indifference, to visit the Gardens for the low charge of one anna—the lowest charge for admission into any Zoological Gardens with which the Committee is acquainted. The higher charge is intended to meet the higher classes of the community, who can best afford to pay for admission. The charge of four annas is only half of the daily charge at the London Zoological Gardens. The financial result of the new rates has been thoroughly successful as will be seen in the statement contained in Appendix No. 1 which shows that there were 9,108 Sunday visitors in 1879 80, against 6,769 Sunday visitors in 1878 79, and a grand total of 121,718 visitors in 1879 80 against 104,582 visitors in 1878 79. But the figures for 1879 80 do not include the children under eight years of age, as they are admitted free, and do not pass through the check turnstile, which counts the paying visitors only. It has been

ascertained by daily observation that children under eight years of age form about 20 per cent of the numbers coming for admission. The financial statement shows the entrance receipts to be Rs 14,366 in 1879 80, against Rs 10,715 in 1878 79. The Committee have reason to believe that the present system is satisfactory to the public and much credit is due to their Honorary Secretary, Mr Louis Schwendler, by whom it was devised. A perusal of the details of the figures contained in the statement showing the number of visitors will prove that the number of visitors from week to week is regulated partly by the state of the weather, and partly by the public holidays. Although the Government Meteorological Observatory is established on the borders of the Gardens, the officer in charge has not yet established any system of weather signals, to intimate to the public when they may expect fine weather. The figures clearly show that the Gardens are a favourite place of resort on the public holidays, and the Committee hope, when the new street tramways are ready for use, to be able to make arrangements for providing a scheme of cheap fares and admissions to the Gardens, which will attract the population of the most remote parts of Calcutta.

11 The Committee are endeavouring to utilize the animals in the Gardens for the amusement of the public, after the manner in vogue in the London Zoological Gardens, and in the Jardin d'Acclimation in Paris. The elephant is brought out every evening for children to ride on. The Aden donkeys are harnessed to a small wagonette, which stands for hire near the entrance. It is proposed to train the ostriches so as to carry riders, but this has as yet been found impracticable for want of a qualified trainer. It would be a great convenience to the public if some Bath chairs or Jimikishas from Japan, or Push pushes from Pondicherry, were introduced, but the Committee desire to leave this to private enterprise. With regard to the general appearance of the Gardens, the Committee have much satisfaction in acknowledging the general approval which is expressed to them of the excellent taste with which the Gardens are laid out, and of the healthy and vigorous growth of the plants, shrubs, and trees. In fact a change of system of garden management has now almost become necessary, for whereas it was necessary at first to protect and encourage the growth of every tree and shrub that was so much needed to contribute shade in a comparative desert, it is now necessary to observe carefully where the pruning knife is most needed, to keep back the too luxuriant undergrowth and too umbrageous branches. The drainage of the roads and paths is on the whole excellent, and they become dry and passable in a very short time after the heaviest showers of rain. The chief thing that is still wanting in the Gardens is a complete iron railing, similar to that which surrounds the jetty yards of the Port Commissioners, to encircle the Gardens, and to prevent the escape of any dangerous animals which may by any mischance get out from their cages. Unfortunately the funds of the Committee are not equal to such an expensive undertaking, and they would be glad to receive a special grant from Government to enable them to carry out this very desirable work.

12 During the year under report the following important additions to the collection were obtained as follows —

	Male	Female	Imperial	Indian
By presentation	151	139	27	34
exchange	37	179		
, purchase	25	151	1	
deposit	1			
Born in the Gardens	29			

The following animals deserve special notice —

- (a)—Six Gyrals (*Bos frontalis*)—presented by W A Campbell Esq of Cluttacong
- (b)—One Clouded Leopard (young male)—presented by S L Leal Esq of Sibsagar Assam
- (c)—The Maharajah of Hill Tipperah who has always taken a lively interest in the development of these Gardens presented amongst other things a Tigress (cub) which is now a half grown handsome animal and is a special favourite with the public
- (d)—The Committee are indebted to Mr F R Stanley Collier Joint Magistrate of Morzufferpore for his valuable contribution of Indian Wolves of which two very fine specimens are now on exhibition

(e)—A presentation worthy of special record for its scientific value is an example of *Porphyryla chloronotus* caught fifty miles off Cape Verde Africa, and presented to these Gardens by Captain H G A Heath

In Appendix II will be found a list of Donors who have contributed animals and birds during the year 1879 80, and to whom the thanks of the Committee are therefore due

Exchanges

13 Several important exchanges of animals and birds have been effected during the year with Mr Rutledge of Calcutta, with the Zoological Society of London, with the Zoological Society of Singapore, and several private gentlemen

This system of exchange with Mr Rutledge has put the Honorary Committee in possession of many valuable and rare birds and mammals, the most noticeable amongst them being the almost unique collection of parrots exhibited in the "Andool House"

Recently an exchange worthy of special mention, has been effected with Mr E T Peysmann of Java, and the Committee have thereby become possessed of some very valuable and rare examples of Malayan avifauna

Purchases

14 The most important animal under the head of purchase is a fine specimen of *Oryx beisa*, obtained through the friendly agency of Mr Ganslandt, the German Consul at Aden

15 The following is a list of important animals and birds that were for the first time exhibited in the Gardens —

Indian Mouse Deer	<i>Traulus meminna</i>	India
Clouded Leopard	<i>T. his macrotis</i>	Himalaya
Grey Squirrel	<i>S. mus emerus</i>	America
Marmot	<i>Arctomys Hodgsoni</i>	Himalaya
Beisa Antelope	<i>Oryx beisa</i>	Africa
Black Macaque	<i>Macacus atratus</i>	?
Gallated Casuary	<i>Ca. varius galcatus</i>	New Guinea
Cockatoo Parakeet	<i>Calceptia Nova Hollandiae</i>	Australia
Amur Pheasant	<i>Ramphastos arifolius</i>	America
Brazilian caracara	<i>Icthyophaga Icthyophaga</i>	South America
Porphyryla	<i>Porphyryla chloronotus</i>	Africa
Razorbilled Curassow	<i>Pauxi mitu</i>	South America
King Lory	<i>Alcedo coruscans</i>	Australia
Orange crested Cockatoo	<i>Cacatua citrinocristata</i>	Timorlakt
Aru cockatoo	<i>Alcedo m. rostratus</i>	Aru island
Magpie	<i>Lica bastriana</i>	Afghanistan

16 Although the general health of the collection has been remarkably good, the Committee have sustained some serious losses during this year from the deaths of valuable animals. Of these the most important were—

1 Giraffe (male)—presented by L D J Lutz, Esq, of Calcutta (*died of colic*)

1 Wild Ass (Sindh)—presented by Sir William Merewether, K C S I

The loss of this animal is particularly to be deplored, as the race of wild ass is gradually becoming extinct. In a state of temporary furor (*qui solet matres furiae equorum*) it ran against the iron railing of its compound with great violence and thus fractured its skull

Finance

17 Financial statement—see Appendix III

The financial condition of the Gardens during this year has been generally favourable. On the 1st April 1880 the Committee had a balance in hand in favour of the Gardens amounting to Rs 2,941 13 3, and their actual income exceeded the budget estimate by Rs 27,760 10 7, which excess was principally due to the fact that a far larger amount of donations and subscriptions were received during the year than could have been safely budgeted for

18 In Appendix No IV there will be found an interesting list showing the appraised value of all the important animals and birds, &c, in the collection. The idea of valuing the animals in this manner is taken from the report of the Zoological Society of Philadelphia in America, where the value of the animals

is calculated as a part of the capital assets of the Society. The values which have been assigned in the present list are really not large. They do not nearly represent the prices which a Native Prince keeping a menagerie would have to pay for the purchase of any one animal from one of the professional dealers in wild animals. As the present list is by no means exhaustive, and only includes the more important and valuable specimens, it may be said that the value of the whole collection amounts in round numbers to about Rs 50,000.

19 The Committee have again to record their acknowledgments of the good services of Baboo Ram Brahmoo Sandyal, the Native Superintendent of the Gardens, and their sense of the value of his work has been marked by their recommendation to Government that his salary be increased from Rs 120 per mensem, rising gradually to Rs 200 per mensem by annual increments of Rs 20. This proposal has been sanctioned by Government.

20 In conclusion, the Committee must record their thanks to the Honorary Secretary, Mr Louis Schwendler, to whose daily vigilant, and unwearying supervision and management the present excellent condition of the Gardens is mainly due.

The mean pressure temperature &c are deduced from the traces of the barograph and thermograph

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard Newman's No 86 formerly at the Surveyor General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office and based on Regnault's modifications of August's formula.

The direction and movement of the wind are taken from the trace of a Bickley's anemograph.

The mouth of the rain gauge is one foot above the ground.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory) The barometer is about 3 feet higher at Alipore and other things being equal reads therefore 003 lower The diurnal range of temperature is also greater at Alipore and the mean temperature apparently about 25 lower and finally the thermometer which has furnished the record of temperature at the Surveyor General's Office during the last 20 years and upwards is found to read 06 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory

Shoal South West of Barren Islands

The following account has been recently published by the Spanish Government—on the authority of D Francisco Vines Captain of the Corvette *Rosa del Juria*—of the existence of a detached shoal lying south west of Barren islands west coast of Madagascar nearly 50 miles distant from that group—

On nearing it to the distance of about half a mile the depth of $3\frac{1}{2}$ fathoms over coarse sand was obtained. Captain Vines then landed on the bank and describes it as being composed of sand almost circular about 14 yards in diameter and to dry about 2 feet at low water with $1\frac{1}{2}$ fathoms at the distance of half a cable around.
